The 144 cu in (2.4 L) inline-six engine was first introduced in the 1960 Ford Falcon. The 144 was made from 1960 through 1964 and averaged 90 hp (67 kW) during the production run. While not known for being powerful or a stout engine, it proved to be economical and could get fairly good gas mileage for the time (up to 30 mpg). This small six was the basis for all the Ford "Falcon" straight-six engines.

To identify a Ford motor, start by checking valve cover bolts on the top of the engine for Ford markings. If the bolts are unmarked, look for an ID tag for manufacturer information. Tags can be found under coil attaching bolts for 6-cylinder engines and some 8-cylinder engines, or under the dipstick attaching bolts on other 8-cylinders.

How to Identify a Ford Motor: 11 Steps (with Pictures ...

The Ford Falcon is a front-engine, rear-drive six passenger compact car produced by Ford from 1959 to 1970, across three generations. Introduced on September 2, 1959, the Falcon was a sales success for Ford initially, outselling contemporary rivals from Chrysler and General Motors, from October 8, 1959, the Falcon was offered in two-door and four-door sedan, two-door and four-door station ...

Ford Falcon (North America) - Wikipedia

To use the 302 intake valve springs, start with 12 stock 302 intake outer retainers. Then take 12 stock 144-250ci 5/16" inner retainers and place them in the 302 outer retainers. Finally, you use the 144-250ci valve locks on the valve stem. Now you have a 5/16" retainer to mate the 144-250ci valves to the 302 intake springs.
