This new book investigates how the relationships of international business networks (one buyer-multiple suppliers) develop over time, looking at the geographical angle as well as an actor composition point of view. Bart Kamp presents a framework that reveals what business-to-business (b2b) factors explain buyer-supplier co-location patterns, making it possible to predict the geographical behaviour of suppliers, and also assesses whether longevity is truly the deep-rooted feature of international b2b network relationships that it is often claimed to be.

This huge photo retrospective features hundreds of photographs depicting Volkswagen vehicles of every size and shape, from the very first Beetle in 1945 to the soon-to-released, all-new Microbus. Photographs culled from company archives and private collections are accompanied by detailed captions that describe the development and production of each vehicle and, in the process, comprise a comprehensive timeline detailing the evolution of Beetles, Buses, Karmann-Ghias, Rabbits, Scirocos, Golfs, Dashers, Things, Jettas, Kubelwagens, Passats and more.

Stefan Schreiboec explores the role and the importance of multimodality to communication in a social and societal context. What is a mode? What is a medium? What is the difference between the two? Can a medium be turned into a mode? An understanding of how modes interact is crucial to an understanding of modern communication. The author offers an overview of the social semiotic approach to communication and complements this approach by adding a cognitive perspective on communication. Thus, the adapted Hallidayan model is extended to take into account the visual mode, music and many others more. Schreiboec promotes a sign system on the basis of which modes other than the verbal cannot only be scientifically defined but also analysed. The author also offers practical tools for those who want to explore meaning making across modes, illustrated by a corpus consisting of the advertising campaign for the VW Polo in four languages.

The acclaimed International Review of Cytology series presents current advances and reviews in cell biology, both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research. Presents current advances and reviews in cell biology, both plant and animal Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research

The Delta Receptor spans current research in delta receptor biology, pharmacology, physiology, and chemistry to identify, advance, and inspire the development of novel drug candidates. It demonstrates the potential significance and impact of the delta receptor in the therapy and treatment of medical conditions such as pain, gastrointestinal disorders, bladder dysfunction, and depression, as well as heart attack prevention. This reference examines the pathophysiological functions and mechanisms of receptor-selective drugs. Documenting key advances in the field, The Delta Receptor represents the most comprehensive and up-to-date studies on receptor applications currently available.
