Infiniti’s G-series coupe and sedan got a new name for 2009. Now known as a G37, the engine is now larger, with displacement now 3.7L. This includes a power increase to 330 hp and 270 lb-feet of torque. All wheel drive is now available, as is a 7-speed automatic transmission. Late in the model year, Infiniti added a convertible model to the G37 ...

As Toyota skids into an ocean of problems and uncertainty continues in the U.S. automotive industry, Lemon-Aid Used Cars and Trucks 20112012 shows buyers how to pick the cheapest and most reliable vehicles from the past 30 years. Lemon-Aid guides are unlike any other car and truck books on the market. Phil Edmonston, Canada’s automotive Dr. Phil for 40 years, pulls no punches. Like five books in one, Lemon-Aid Used Cars and Trucks is an expos of car scams and gas consumption lies; a do-it-yourself service manual; an independent guide that covers beaters, lemons, and collectibles; an archive of secret service bulletins granting free repairs; and a legal primer that even lawyers cant beat! Phil delivers the goods on free fixes for Chrysler, Ford, and GM engine, transmission, brake, and paint defects; lets you know about Corvette and Mustang tops that fly off; gives the lowdown on Honda, Hyundai, and Toyota engines and transmissions; and provides the latest information on computer module glitches.

Steers buyers through the the confusion and anxiety of new and used vehicle purchases like no other car-and-truck book on the market. “Dr. Phil,” along with George Iny and the Editors of the Automobile Protection Association, pull no punches.

Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don’t perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst “beaters” on the market. More “secret” warranties taken from automaker internal service bulletins and memos than ever.

“Dr. Phil,” Canada’s best-known automotive expert, invites another driver to come aboard. After forty-six years and almost two million copies sold, Phil Edmonston is joined by a co-pilot for the Lemon-Aid Guide — George Iny, along with the editors of the Automobile Protection Association. The 2017 Lemon-Aid has everything: an encyclopedic lineup of the best and worst cars, trucks, and SUVs sold since 2007; secret warranties and tips on the “art of complaining” to help you get your money back; and new-car buying tips that will save you tons of money by revealing the inflated cost of fancy and frivolous add-ons. Lemon-Aid is an essential guide for careful buyers and long-time gear-heads who don’t know as much as they think.

This book steers buyers through the the confusion and anxiety of new and used vehicle purchases unlike any other car-and-truck book on the market. “Dr. Phil,” Canada’s best-known automotive expert for more than forty-five years, pulls no punches.

Witty and softly sardonic, William Schiffs autobiographical romp describes his lifelong travels from early childhood to the Golden Years. Growing Up and Getting Old Behind the Wheel: An American Auto Biography is framed in a web of Americana, including cars he has ridden in, driven, modified, and even stolen. The span of his story is peppered with allusions to the locales, books, films, music, and social politics of the times he has experienced. He describes his youthful descent with friends into light criminalityhis incarceration, and his ultimate salvation and redemption through America’s universities, rather than through its Churches. He sketches his menial jobs as a youth, as well as his later roles as student, university professor, parent, behavioral scientist, and retiree. If youve lived in America between 1940 and today, youll want to come along on the engrossing scenic drive through his vivid memories.

This compendium of everything thats new in cars and trucks is packed with feedback from Canadian drivers, insider tips, internal service bulletins, and confidential memos to help the consumer select whats safe, reliable, and fuel-frugal.

Phil Edmonston, Canada’s automotive “Dr. Phil,” pulls no punches. He says there’s never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, “rodent snack” wiring, and mind-boggling depreciation)Many 2011-12 automobiles have “chin-to-chest head restraints, blinding dash reflections, and dash gauges that can’t be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underwayEthanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive EngineersGM’s 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that “killed” its own electric car more than a decade agoyou can save \$2,000 by cutting freight fees and “administrative” chargesDiesel annual urea fill-up scams cancost you \$300, including an \$80 “handling” charge for \$25 worth of ureaLemon-Aid’s 2011-12 Endangered Species List: the Chinese Volvo, the Indian Jaguar and Land Rover, the Mercedes-Benz Smart Car, Mitsubishi, and Suzuki
