11 Now let us look at some problems and their corresponding pseudocode, flowcharts and Python programs. Problem 3.1: Calculate and print the average of three numbers: 5, 10, and 15. Task 1 - Identify your input: Values of 5, 10, and 15 Task 2 - Identify the goal or objective: Average the input values. The equation for calculating an average is to add all the numbers to create a sum.
