This book explores Africa's involvement in the Atlantic world from the fifteenth century to the eighteenth century. It focuses especially on the causes and consequences of the slave trade, in Africa, in Europe, and in the New World. African institutions, political events, and economic structures shaped Africa's voluntary involvement in the Atlantic arena before 1680. Africa's economic and military strength gave African elites the capacity to determine how trade with Europe developed. Thornton examines the dynamics of colonization which made slaves so necessary to European colonizers, and he explains why African slaves were placed in roles of central significance. Estate structure and demography affected the capacity of slaves to form a self-sustaining society and behave as cultural actors, transferring and transforming African culture in the New World.

Most histories seek to understand modern Africa as a troubled outcome of nineteenth century European colonialism, but that is only a small part of the story. In this celebrated book, beautifully translated from the French edition, the history of Africa in the nineteenth century unfolds from the perspective of Africans themselves rather than the European powers. It was above all a time of tremendous internal change on the African continent. Great jihads of Muslim conquest and conversion swept over West Africa. In the interior, warlords competed to control the internal slave trade. In the east, the sultanate of Zanzibar extended its reach via coastal and interior trade routes. In the north, Egypt began to modernize while Algeria was colonized. In the south, a series of forced migrations accelerated, spurred by the progression of white settlement. Through much of the century African societies assimilated and adapted to the changes generated by these diverse forces. In the end, the West's technological advantage prevailed and most of Africa fell under European control and lost its independence. Yet only by taking into account the rich complexity of this tumultuous past can we fully understand modern Africa from the colonial period to independence and the difficulties of today.

Revealing the central yet intentionally obliterated role of Africa in the creation of modernity, *Born in Blackness* vitally reframes our understanding of world history. Traditional accounts of the making of the modern world afford a place of primacy to European history. Some credit the fifteenth-century Age of Discovery and the maritime connection it established between West and East; others the accidental unearthing of the “New World.” Still others point to the development of the scientific method, or the spread of Judeo-Christian beliefs; and so on, ad infinitum. The history of Africa, by contrast, has long been relegated to the remote outskirts of our global story. What if, instead, we put Africa and Africans at the very center of our thinking about the origins of modernity? In a sweeping narrative spanning more than six centuries, Howard W. French does just that, for *Born in Blackness* vitally reframes the story of medieval and emerging Africa, demonstrating how the economic ascendancy of Europe, the anchoring of democracy in the West, and the fulfillment of so-called Enlightenment ideals all grew out of Europe’s dehumanizing engagement with the “dark” continent. In fact, French reveals, the first impetus for the Age of Discovery was not—as we are so often told, even today—Europe’s yearning for ties with Asia, but rather its centuries-old desire to forge a trade in gold with legendarily rich Black societies sequestered away in the heart of West Africa. Creating a historical narrative that begins with the commencement of commercial relations between Portugal and Africa in the fifteenth century and ends with the onset of World War II, *Born in Blackness* interweaves precise historical detail with poignant, personal reportage. In so doing, it dramatically retrieves the lives of major African historical figures, from the unimaginably rich medieval emperors who traded with the Near East and beyond, to the Kongo sovereigns who heroically battled seventeenth-century European powers, to the ex-slaves who liberated Haitians from bondage and profoundly altered the course of American history. While French cogently demonstrates the centrality of Africa to the rise of the modern world, *Born in Blackness* becomes, at the same time, a far more significant narrative, one that reveals a long-concealed history of trivialization and, more often, elision in depictions of African history throughout the last five hundred years. As French shows, the achievements of sovereign African nations and their now-far-flung peoples have time and again been etiolated and deliberately erased from modern history. As the West ascended, their stories—siloed and piecemeal—were swept into secluded corners, thus setting the stage for the hagiographic “rise of the West” theories that have endured to this day. “Capacious and compelling” (Laurent Dubois), *Born in Blackness* is epic history on the grand scale. In the lofty tradition of bold, revisionist narratives, it reframes the story of gold and tobacco, sugar and cotton—and of the greatest “commodity” of them all, the twelve million people who were brought in chains from Africa to the “New World,” whose reclaimed lives shed a harsh light on our present world.

An introduction to the complex relationship between African Americans and the African continent. What is an “African American” and how does this identity relate to the African continent? Rising immigration levels, globalization, and the United States’ first African American president have all sparked new dialogue around the question. This book provides an introduction to the relationship between African Americans and Africa from the era of slavery to the present, mapping several overlapping diasporas. The diversity of African American identities through relationships with region, ethnicity, slavery, and immigration are all examined to investigate questions fundamental to the study of African American history and culture.

Based on substantial new research from primary sources and archives, this accessible interpretative history of West Central Africa from earliest times to 1852 gives comprehensive and in-depth coverage of the region. With equal focus given to both internal histories or inter-state interactions and external dynamics and relationships, this study represents an original approach to regional histories which goes beyond the existing scholarship on the area. By contextualising and expanding its range, to include treatment of the Portuguese colony of Angola, John K. Thornton provides new understandings of significant events, people, and inter-regional interactions which aid the grounding of the history of West Central Africa within a broader context. A valuable resource to students and scholars of African history.

This book explores Africa's involvement in the Atlantic world from the fifteenth through the eighteenth centuries. It focuses especially on the causes and consequences of the slave trade, in Africa, in Europe, and in the New World. Prior to 1680, Africa's economic and military strength enabled African elites to determine how trade with Europe developed. Thornton examines the dynamics that made slaves so necessary to European colonizers. He explains why African slaves were placed in significant roles. Estate structure and demography affected the capacity of slaves to form a self-sustaining society and behave as cultural actors. This second edition contains a new chapter on eighteenth century developments.

Although a number of important studies of American slavery have explored the formation of slave cultures in the English colonies, no book until now has undertaken a comprehensive assessment of the development of the distinctive Afro-Creole culture of colonial Louisiana. This culture, based upon a separate language community with its own folkloric, musical, religious, and historical traditions, was created by slaves brought directly from Africa to Louisiana before 1731. It still survives as the acknowledged cultural heritage of tens of thousands of people of all races in the southern part of the state. In this pathbreaking work, Gwendolyn Midlo Hall studies Louisiana's creole slave community during the eighteenth century, focusing on the slaves' African origins, the evolution of their own language and culture, and the role they played in the formation of the broader society, economy, and culture of the region. Hall bases her study on research in a wide range of archival sources in Louisiana, France, and Spain and employs several disciplines--history, anthropology, linguistics, and folklore--in her analysis. Among the topics she considers are the French slave trade from Africa to Louisiana, the ethnic origins of the slaves, and relations between African slaves and native Indians. She gives special consideration to race mixture between Africans, Indians, and whites; to the role of slaves in the Natchez Uprising of 1729; to slave unrest and conspiracies, including the Pointe Coupee conspiracies of 1791 and 1795; and to the development of communities of runaway slaves in the cypress swamps around New Orleans.

Africa welcomes business investment and offers some of the world’s highest returns and impacts Africa has tremendous economic potential and offers rewarding opportunities for global businesses looking for new markets and long-term investments with favorable returns. Africa has been one of the world’s fastest-growing regions over the past decade, and by 2030 will be home to nearly 1.7 billion people and an estimated \$6.7 trillion worth of consumer and business spending. Increased political stability in recent years and improving regional integration are making market access easier, and business expansion will generate jobs for women and youth, who represent the vast majority of the population. Current economic growth and poverty-alleviation efforts mean that more than 43 percent of the continent’s people will reach middle- or upper-class status by 2030. *Unlocking Africa’s Business Potential* examines business opportunities in the eight sectors with the highest potential

returns on private investment—the same sectors that will foster economic growth and diversification, job creation, and improved general welfare. These sectors include: consumer markets, agriculture and agriprocessing, information and communication technology, manufacturing, oil and gas, tourism, banking, and infrastructure and construction. The book 's analysis of these sectors is based on case studies that identify specific opportunities for investment and growth, along with long-term market projections to inform decision-making. The book identifies potential risks to business and offers mitigation strategies. It also provides policymakers with solutions to attract new business investments, including how to remove barriers to business and accelerate development of the private sector.
