Ageing and Health unit - World Health Organization

Age is a driver of health spending which is partly due to the fact that the prevalence of multi-morbidity also rises with age. As shown in the graph below from the Office for Budget Responsibility...

Ageing and health expenditure - Public health matters

Healthy ageing and caring Being able to stay healthy in later life is a crucial issue for all of us. We know that older people often do not feel supported to look after their own health, particularly people with multiple long term conditions, including frailty. This has a detrimental impact on their quality of life and health outcomes.

NHS England \u25ba Healthy ageing and caring

Comprehensive public health action on population ageing is urgently needed. This will require fundamental shifts, not just in the things we do, but in how we think about ageing itself. The World report on ageing and health outlines a framework for action to foster Healthy Ageing built around the new concept of functional ability. Making these investments will have valuable social and economic returns, both in terms of health and wellbeing of older people and in enabling their on-going ...

WHO | World report on ageing and health

Although populations around the world are rapidly ageing, evidence that increasing longevity is being accompanied by an extended period of good health is scarce. A coherent and focused public health response that spans multiple sectors and stakeholders is urgently needed.

The World report on ageing and health: a policy framework ...

To ensure adults live not only longer but healthier lives, a Global strategy and action plan on ageing and health was adopted in May 2016 by the World Health Assembly. This Strategy focuses on five strategic objectives and is a significant step forward in establishing a framework to achieve Healthy Ageing for all. It includes a call for countries to commit to action, and develop

Healthy ageing The population in the WHO European Region is ageing rapidly: its median age is already the highest in the world, and the proportion of people aged 65 and older is forecast to increase from 14% in 2010 to 25% in 2050.

WHO/Europe | Healthy ageing - World Health Organization

Good general health and social care is important for promoting older people's health, preventing disease and managing chronic illnesses. Training all health providers in working with issues and disorders related to ageing is therefore important. Effective, community-level primary mental health care for older people is crucial.
