Digital engineering is a constantly evolving concept that presents transformational opportunities for architecture, engineering and construction. Digital engineering is an elusive concept founded in the technological transformation impacting the AEC sector. While there is no agreed definition, the conversation surrounding digital engineering could be seen as a response to increasing complexity in the industry.

Most people recognise the concept of a digital twin that begins with building a 3D model of a facility. But the danger with starting with a 3D model is that it could easily become a pet project for senior operations or enterprise management, rather than a valuable tool in the hands of engineers and operators.
