Now British Intelligence agent Nick Stone and "runner" (and former lover) Sarah Greenwood have become the hunted, racing deeper into a dark, deadly conspiracy that will change the course of world events - and the lives of millions. With seventeen years of active service in the elite SAS force, Andy McNab writes from his own harrowing experiences. Packed with authentic procedural details, as relentless as a fast-burning fuse, Crisis Four is a thriller so gritty and real that you won't know where fact ends and fiction begins.

RSM Simplified keeps formulas to a minimum and makes liberal use of figures, charts, graphs and checklists. It offers many relevant examples, with amusing sidebars and do-it-yourself exercises that will lead readers to the peak potential for their product quality and process efficiency. The authors, Mark J. Anderson and Patrick J. Whitcomb, are principals of Stat-Ease, a provider of DOE training, consulting, and software. They both are professional chemical engineers. Anderson has more of a business background while Whitcomb specializes in statistics. Incorporated into this book is the more advanced Design-Expert, version 7 software for Windows, with a 180-day trial, so the reader can do the complex statistical computations, generate the necessary graphics (2D and 3D maps) and perform the numerical optimization.

"The best suspense writer to put pen to paper since Alistair MacLean" (Stephen Coonts) follows up the international bestselling Firewall with the most gripping and timely Nick Stone mission yet. LAST LIGHT Top-secret operative Nick Stone has just aborted an officially sanctioned assassination attempt at the Houses of Parliament. Once he saw who his intended target was, he instinctively pulled out. Now Stone is in a world of trouble. His bosses have handed him a chilling ultimatum: fly to Panama and finish the job he just botched, or Kelly, the young orphan in his guardianship, will be killed. Deep in the sweltering jungle of Central America on an assignment that makes little sense to him, Stone quickly finds himself up to his neck in high-stakes action as he closes in on the key players in a lethal conspiracy involving Colombian guerrillas, the U.S. government, and Chinese big business. Only Stone can stop an international crisis and salvage Western interests, but first there is a critically injured friend to rescue, as well as miles of dense rainforest to navigate. In the explosive finale at the Panama Canal, with countless innocent lives hanging in the balance, Stone is forced to make the toughest decision of his life. Drawing on his experiences as a member of Britain's legendary Special Air Service, world-renowned thriller writer Andy McNab "delivers authenticity in spades" (Publishers Weekly). "McNab's greatest asset," according to London's Sunday Times, "is that the heart of his fiction is not fiction: other thriller writers do their research, but he has actually been there."
