Principles of Macroeconomics covers the scope and sequence for a two-semester principles of economics course. The text also includes many current examples, including: discussions on the great recession, the controversy among economists over the Affordable Care Act (Obamacare), the recent government shutdown, and the appointment of the United States' first female Federal Reserve chair, Janet Yellen. The pedagogical choices, chapter arrangements, and learning objective fulfillment were developed and vetted with feedback from educators dedicated to the project. The outcome is a balanced approach to micro and macro economics, to both Keynesian and classical views, and to the theory and application of economics concepts. Current events are treated in a politically-balanced way, as well. The images in this textbook are grayscale.

Macroeconomics in Context lays out the principles of macroeconomics in a manner that is thorough, up to date, and relevant to students. This new edition is no exception, with Greg Mankiw streamlining his hallmark approach and adding powerful new digital learning options while improving the book's already exemplary focus on teaching students to apply the analytical tools of macroeconomics to current events and policies. This comprehensive text is the ideal accompaniment to undergraduate courses in Macroeconomics.

Now firmly established as one of the leading economics principles texts in the UK and Europe, this exciting new fourth edition of Economics by N. Gregory Mankiw (Harvard University) and Mark P. Taylor (Washington University), has been fully updated. New topics have been added in including theories on, for example, Marxist and Feminist theories on labour giving wider context to economic issues. A new chapter on Issues in Financial markets has been added covering the financial crisis and its causes and the final chapter has been updated to reflect the post-crisis world and how theories of the crisis have emerged.
