Beyond 2020 -- a vision for the future is a non-partisan, non-political platform where average Americans can express their vision for a post-2020 America. Think of this page as a dgital soap box that gives people a voice in the public square. It is operated by volunteers as a public sociology project and is not affiliated or aligned with any other organization, political party, or movement.

Beyond 2020 - A Vision for the Future - Home | Facebook

In 1998, Dr Kalam and Y.S. Rajan published the now iconic India 2020, a vision document for the new millennium that charted how India could become one of the top five economic powers in the world by 2020. Sixteen years later, as the year 2020 approaches, the authors came out with Beyond 2020 , another book to take stock of how much India has achieved by now and what lies ahead.

India 2020 is about to become a reality. Are we ready? As Dr Kalam and Y.S. Rajan had contended in their landmark vision document, India 2020, India has steadily moved towards becoming one of the top five economic powers in the twenty-first century. India ' s growth story has seen new opportunities and emerging technologies that make faster and more inclusive growth viable. In Beyond 2020, Kalam and Rajan argue that a renewed policy focus is now needed for agriculture, manufacturing, mining, the chemicals industry, healthcare and infrastructure to invigorate these sectors and boost economic growth. India can still make it to the list of developed nations in a decade. This timely book provides an action plan for that transformation.

In this ground-breaking vision document, first published in 1998, Dr A.P.J. Abdul Kalam and Y.S. Rajan offer a blueprint for India to be counted among the world ' s top five economic powers by the year 2020. They cite growth rates and development trends to show that the goal is not unrealistic. Past successes—the green revolution and satellite-based communication linking remote regions of the country, for instance—bear them out. The same sense of purpose can make us a prosperous, strong nation in a matter of years, assert Kalam and Rajan. This is a book that every citizen who hopes for a better India must read.

International speaker and optometrist extraordinaire, Dr. Susan Truong, will tell you that 20/20 defines perfect vision. However, in her book, Beyond 20/20 Vision, she walks you through seven life lessons that will help you to achieve clarity so that you can live your best life! These life lessons will reveal to you that perfect does not stop at 20/20, that there is something much better, way beyond 20/20! Lessons such as living with intention, finding a purpose greater than yourself, facing your fears, embracing change, thriving with a positive mindset, discovering your why, and recognizing your blindspots. These lessons will force you to reach deep into the depth of your heart and soul, which is a necessity if you want to achieve and define the sharpest vision of your best life, your dream life in order to live to your fullest potential. Sight is a function of your eyes. Vision is a function of your heart! Close your eyes and open your heart and mind. Do this as you go through these seven lessons and the exercises within them and you will SEE the path to truly living your best life, the one that you so deserve.

What is it that we as a nation are missing? Why, given all our skills, resources and talents, do we settle so often for the ordinary instead of striving to be the best? At the heart of Ignited Minds is an irresistible premise: that people do have the power, through hard work, to realize their dream of a truly good life. Kalam ' s vision document of aspiration and hope motivates us to unleash the dormant energy within India and guide the country to greatness.

The Housewright Symposium on the Future of Music Education, held at Florida State University in Tallahassee in 1999, assembled 175 music educators, industry representatives, community arts leaders, and students to speculate about what music education might look like in 2020 and the directions the field might take. Participant presentations were published in 2000 as the book Vision 2020, and the current reprint shares the ideas of the likes of Wiley Housewright, Clifford Madsen, Judith Jellison, and other illuminati of music teaching and learning. The contributors to this book asked leading questions about the value of music education, its place in the curriculum, and its possible futures. Many preservice music teachers in the intervening twenty years read chapters like " Why Study Music? " or " How Can All People Continue to Be Involved in Music Education? " —questions whose answers are as relevant today as they were at the end of the last century. As music education moves into a new phase with the current pandemic, the topics considered in this publication are of increasing importance to the discussion. An introduction by two successive presidents of the National Association for Music Education, Kathleen D. Sanz of Florida and Mackie V. Spradley of Texas, place this places this reprint edition in the context of the present day and looks at future directions of the profession.

In this groundbreaking vision document, first published in 1998, Dr A.P.J. Abdul Kalam and Y.S. Rajan offer a blueprint for India to be counted among the world's top five economic powers by the year 2020. A sense of purpose can make us a prosperous, strong nation in a matter of years, assert Kalam and Rajan. This is a book that every citizen who hopes for a better India must read. 'A book of dreams rooted in reality.' Indian Express 'Combines the ideas of a visionary, the expertise of a great planner and the considered recommendations of some of India's best technology experts.' Businessworld 'This is no ordinary book. . . . It should be in all libraries and on the desk of everyone who dreams about the future of India.' Tribune

Seeing Beyond 2020 Vision takes the reader on a journey beyond the new normal, looking behind the scenes played out on the news into seeing Good News for the future.

The National Academies of Sciences, Engineering, and Medicine was asked to articulate a 5-year strategic vision for international health security programs and provide findings and recommendations on how to optimize the impact of the Department of Defense (DOD) Biological Threat Reduction Program (BTRP) in fulfilling its biosafety and biosecurity mission. Because BTRP is just one of several U.S. government programs conducting international health security engagement, both the strategic vision and the success of the program rely on coordinating actions with the U.S. government as a whole and with its international partners. This report provides several recommendations for optimizing BTRP success in its current mission and the wider-looking strategic vision it proposes.

A New 20/20 Vision is an inspired road map for creating sustainable happiness. Rocheste billboard illustrates the ability to always have perspective and find joy in all aspects of life. By adopting this innovative positive filter, you too can redefine the way you experience the world. This timely approach to how we define authenticity and success lays the foundation for turning personal soul communication into purposeful action. -Reclaim your truth -Defy the odds by learning how to live with endless thankfulness -Make joy a prerequisite to attract what you truly desire -Design a life beyond your wildest dreams Your journey begins today.

A powerful reminder to anyone who thinks design is primarily a visual pursuit. The Senses accompanies a major exhibition at the Cooper-Hewitt Smithsonian Design Museum that explores how space, materials, sound, and light affect the mind and body. Learn how contemporary designers, including Petra Blaisse, Bruce Mau, Malin+Goetz and many others, engage sensory experience. Multisensory design can solve problems and enhance life for everyone, including those with sensory disabilities. Featuring thematic essays on topics ranging from design for the table to tactile graphics, tactile sound, and visualizing the senses, this book is a call to action for multisensory design practices. The Senses: Design Beyond Vision is mandatory reading for students and professionals working in diverse fields, including products, interiors, graphics, interaction, sound, animation, and data visualization, or anyone seeking the widest possible understanding of design. The book, designed by David Genco with Ellen Lupton, is edited by Lupton and curator Andrea Lipps. Includes essays by Lupton, Lipps, Christopher Brosius, Hansel Bauman, Karen Kraskow, Binglei Yan, and Simon Kinner.
