perspectives and experiences of Black women. There are several arguments in support of this definition. First, Berger and Luckmann (1966); and Mannheim (1936) similarly argue that the definition implies that the overall content of the thought and the historical and factual circumstances of Black women are inseparable.

Shadowboxing presents an explosive analysis of the history and practice of black feminisms, drawing upon political theory, history, and cultural studies in a sweepingly interdisciplinary work. Joy James charts new territory by synthesizing theories of social movements with cultural and identity politics. She brings into the spotlight images of black female agency and intellectualism in radical and anti-radical political contexts. From a comparative look at Ida B. Wells, Ella Baker, Angela Davis, and Assata Shakur to analyses of the black woman in white cinema and the black man in feminist coalitions, she focuses

attention on the invisible or the forgotten. James convincingly demonstrates how images of powerful women are either consigned to oblivion or transformed into icons robbed of intellectual power. Shadowboxing honors and analyzes the work of black activists and intellectuals and, along the way, redefines the sharp divide between intellectual work and political movements. A daringly original study, this book changes what it means to be American.

Outside the US and the academy. Inspired by a BFS lens, the essays are critical, personal, political and oriented toward social justice. Key themes include the origins of BFS, expositions of BFS orientations to research that extend disciplinary norms, and contradictions of the pleasures and costs of such an approach both academically and personally. Authors explore their own sociological legacy of intellectual development to raise critical questions of intellectual thought and self-reflexivity. The book highlights the dynamism of BFS so future generations of scholars can expand upon and beyond the book's key themes.

The concept of intersectionality has become a central topic in academic and activist circles alike. But what

What does it mean, and why has it emerged as such a vital lens through which to explore how social inequalities of race, class, gender, sexuality, age, ability, and ethnicity shape one another? In this fully revised and expanded second edition of their popular text, Patricia Hill Collins and Sirma Bilge provide a much-needed introduction to the field of intersectional knowledge and praxis. Analyzing the emergence, growth, and contours of the concept of intersectionality, the authors also consider its global reach through an array of new topics such as the rise of far-right populism, reproductive justice, climate change, and digital environments and cultures. Accessibly written and drawing on a plethora of lively examples to illustrate its arguments, the book highlights

intersectionality's potential for understanding complex architecture of social and economic inequalities and bringing about social justice-oriented change. Intersectionality will be an invaluable resource for anyone grappling with the main ideas, debates, and new directions in this field.

historical consciousness as captured through the Black feminist imagination that re-centers the perspectives of Black women in the African Diaspora, and revisits how Black women's transatlantic histories are re-imagined and politicized in our contemporary moment. Connecting select historical case studies – from the Caribbean, the African continent, North America, and Europe – while also examining the retelling of these histories in the work of present-day writers and artists, Janell Hobson utilizes a Black feminist lens to rescue the narratives of African-descended women, which have been marginalized, erased, forgotten, and/or mis-remembered. women on different sides of the "door of no return" during the era of the transatlantic slave trade. Even ubiquitous "Black queens" heralded and signified in a Beyoncé music video or a Janelle Monáe lyric. And then there are those whose names we will never forget, like the iconic Harriet Tubman. This critical interdisciplinary intervention will be key reading for students and researchers studying African American women, Black feminisms, feminist methodologies, Africana studies, and women and gender studies.
