Introduction to AutoCAD Plant 3D 2021 is a learn-by-doing manual focused on the basics of AutoCAD Plant 3D. The book helps you to learn the process of creating projects in AutoCAD Plant 3D rather than learning specific tools and commands. It consists of sixteen tutorials, which help you to complete a project successfully. The topics explained in the plant design process are: - Creating Projects - Creating and Editing P&IDs - Managing Data - Generating Reports - Creating 3D Structures - Adding Equipment - Creating Piping - Validate Drawings - Creating Isometric Drawings - Creating Orthographic Drawing - Project Management, and - Printing and Publishing Drawings

With stories of 50 incredible hiking routes in 30 countries, from New Zealand to Peru, plus a further 150 suggestions, Lonely Planet's Epic Hikes of the World will inspire a lifetime of adventure on foot. From one-day jaunts and urban trails to month-long thru-hikes, cultural rambles and mountain expeditions, each journey shares one defining feature: being truly epic. In this follow-up to Epic Bike Rides and Epic Drives, we share our adventures on the world's best treks and trails. Epic Hikes is organised by continent, with each route brought to life by a first-person account, beautiful photographs and charming illustrated maps. Additionally, each hike includes trip planning advice on how to get there, where to stay, what to pack and where to eat, as well as recommendations for three similar hikes in other regions of the world. Hikes featured include: Africa & the Middle East: Cape Town's Three Peaks (South Africa) Kilimanjaro (Tanzania) Camp to Camp in South Luangwa National Park (Zambia) Americas: Angel's Landing, Zion National Park (USA) Skyline Trail, Jasper National Park (Canada) Concepción volcano hike (Nicaragua) Asia: 88 Sacred Temples of Shikoku Pilgrimage (Japan) Markha Valley (India) Gubeikou to Jinshanling on the Great Wall (China) Europe: Wordsworth's Backyard: Dove Cottage and around Rydal and Grasmere (UK) Alpine Pass Route (Switzerland) Camino de Santiago (Spain) Oceania: Sydney's Seven Bridges Walk (Australia) The Routeburn Track (New Zealand) Kokoda Track (Papua New Guinea) About Lonely Planet: Lonely Planet is a leading travel media company and the world's number one travel guidebook brand, providing both inspiring and trustworthy information for every kind of traveller since 1973. Over the past four decades, we've printed over 145 million guidebooks and grown a dedicated, passionate global community of travellers. You'll also find our content online, on mobile, video and in 14 languages, 12 international magazines, armchair and lifestyle books, ebooks, and more. Important Notice: The digital edition of this book may not contain all of the images found in the physical edition.

Designed for introductory courses in aerodynamics, aeronautics and flight mechanics, this text examines the aerodynamics, propulsion, performance, stability and control of an aircraft. Major topics include lift, drag, compressible flow, design information, propellers, piston engines, turbojets, statics, dynamics, automatic stability and control. Two new chapters have been added to this edition on helicopters, V/STOL aircraft, and automatic control.

Current building costs for residential, commercial, and industrial construction. Estimated prices for every common building material, the labor cost to install the material and a total "installed" cost. For those jobs where you can't rely on your past experience to estimate, rely on the prices in this national standard of construction costs to get you safely in the ballpark. Provides manhours, recommended crew, and the labor cost for installation of every job and practically every type of material in construction. Provides clear descriptions on what is included in the job being estimated so you know exactly what the job and the prices for that job entail. Every cost is carefully described. It even provides suggested crew sizes, and equipment rates.

'...erudite, thought-provoking and well-written.' Archie Brown, Professor of Politics, Oxford University. The return to prominence of the concept of political culture offers an opportunity to re-evaluate its contribution to the social sciences. This study casts a broader than usual net, embracing not only political science (with equal emphasis placed on the concept's use in communist studies), but also sociology and history. On this basis a distinctive theory of political culture, and not merely another typology, is developed. Political culture, instead of being a token in the sterile debate between interest- and culture-based explanation, offers the means of transcending that debate.

Aldo Leopold, father of the "land ethic," once said, "The time has come for science to busy itself with the earth itself. The first step is to reconstruct a sample of what we had to begin with." The concept he expressedâ€"restorationâ€"is defined in this comprehensive new volume that examines the prospects for repairing the damage society has done to the nation's aquatic resources: lakes, rivers and streams, and wetlands. Restoration of Aquatic Ecosystems outlines a national strategy for aquatic restoration, with practical recommendations, and features case studies of aquatic restoration activities around the country. The committee examines: Key concepts and techniques used in restoration. Common factors in successful restoration efforts. Threats to the health of the nation's aquatic ecosystems. Approaches to evaluation before, during, and after a restoration project. The emerging specialties of restoration and landscape ecology.
