The urgent need to keep pace with the accelerating globalization of manufacturing in the 21st century has produced rapid advancements in technology, research and innovation. This book presents the proceedings of the 16th International Conference on Manufacturing Research incorporating the 33nd National Conference on Manufacturing Research (ICMR 2018), held in Skövde, Sweden, in September 2018. The aim of the conference is to create a friendly and inclusive environment, bringing together researchers, academics and industrialists with practical and theoretical knowledge to share and discuss emerging trends and new challenges. The book is divided into 12 parts, covering areas such as the manufacturing process; robots; product design and development; smart manufacturing; and lean, among others. Covering both cutting-edge research and recent industrial applications, the book will appeal to all those with an interest in recent advances in manufacturing technology.

This book provides the first comprehensive sociological study of the contemporary National Socialist movement in Sweden, including how it has developed since the 1990s until the present. It covers the ideas and political aspects of the movement, as well as the subjective and very personal stories told by young men and women who in some cases have left the movement and in others remained. Through a large number of detailed stories of the movement's violence, hatred, and ideology, as well as stories of the life plans and dreams involved in re-entering society, the study on which the book is based provides knowledge, hope and new directions for studies on the National Socialist movement. Additionally, the book provides innovative research on the relation between the life trajectories of National Socialists and their significant others, allowing us to establish better and more scientific strategies for preventing radicalization and promoting de-radicalization. The book is aimed at students of sociology, social science and researchers studying hate movements and violent extremism. It is also meant for professionals such as teachers, social workers and youth workers who may encounter radicalization in their work as well as being a vital contribution for policymakers within the field.

This book offers an in-depth study of personal accounts of men and women who have at one time entered, participated in and ultimately exited the neo-Nazi movement, with a focus on advanced Western states. Through detailed stories of the movement's violence, hatred, and ideology, coupled with narratives of the individuals' life plans and dreams when entering the movement and reintegrating into society, the work provides knowledge, hope and new directions for readers to better understand and react to a reinvigorated extreme right across Western nations. The book provides innovative research on the relationship between the life trajectories of neo-Nazis and their significant others, enabling better and more evidence-based strategies for preventing radicalization and promoting deradicalization. The extensive case studies include the voices of those who returned to the movement, or never left at all, providing a rare opportunity to compare active, former and returned right-wing extremists. The main contribution of the book is to provide an innovative approach to the oral history of young men and women who have participated in different national and local neo-Nazi movements in Western countries, namely Sweden and the United States. In order to understand the current trends within the movement and their relationship to the surrounding society, this shift calls for in-depth analyses based on social-psychological and sociological perspectives. Stressing the importance of having a gender theory, socio-cultural, historical, and both a national and contextual perspective on the neo-Nazi movement, this book contributes new knowledge to this field of research. This book will be of much interest to students of political extremism, radicalisation, terrorism studies and social psychology.

We believe that businesses and organisations misses most digital opportunities that are right in front of them, mostly because they get lost in thinking about the future and then forget everything about the present. They talk about artificial intelligence and bitcoins, but overlook the obvious opportunities which they can benefit from today. This book contains 69 examples of how digital experiments can make your daily work and organisation even better. All examples and experiments in the book can be used immediately, and only require a very minimal investment in time and resources.

This volume of The Official History of Australian Peacekeeping, Humanitarian and Post-Cold War Operations recounts the activities of Australia's military forces in response to overseas natural disasters. The military's involvement in overseas emergency management is focused primarily on the period immediately after disaster strikes: transporting relief supplies, providing medical assistance, restoring basic services and communications and other logistical support. Beginning with the 1917–18 influenza epidemic that ravaged the Pacific and culminating with the 2005 Pakistan earthquake, this book covers Australia's response to some of the most catastrophic natural events of the twentieth century. In their Time of Need is richly detailed, as Steven Bullard weaves together official government records and archival images with the personal narratives and photographs of those who served. This volume is an authoritative and compelling history of Australia's efforts to help their neighbours.
