Part of a mini series of Focus books on COVID-19 in Malaysia, the chapters in this book address the pandemic 's impacts on education and literacy. Covering a range of teaching and learning challenges impacting learners and teachers, the contributors highlight the pervasiveness of the pandemic on Malaysian society and how Malaysians have found ways to cope. They focus mainly on students ' COVID-19 narratives, digital and health literacy issues, language and new vocabulary. This is an opportunity to witness how researchers from multiple disciplines can join forces during challenging times. There are a great many lessons to be learned from the successes and failures in responding to the pandemic and the measures that have been necessary to contain it. A fascinating read for scholars and educators with an interest in crisis management in non-Western contexts, especially those with a particular interest in Malaysia, or Southeast Asia more generally.

As part of the CIPD Revision Guides series, these revision guides are designed to aid CIPD students in preparing for their examinations. Based on the experience and skills of the CIPD Examiners, these guides provide comprehensive and relevant information and invaluable advice for students in the lead up to their CIPD examinations. There are opportunities to practise exam technique, assess knowledge levels and benefit from handy tips on improving exam performance.

A hands-on guide to the use of quantitative methods and software for making successful business decisions The appropriate use of quantitative methods lies at the core of successful decisions made by managers, researchers, and students in the field of business. Providing a framework for the development of sound judgment and the ability to utilize quantitative and qualitative approaches, Data Driven Business Decisions introduces readers to the important role that data plays in understanding business outcomes, addressing four general areas that managers need to know about: data handling and Microsoft Excel®, uncertainty, the relationship between inputs and outputs, and complex decisions with trade-offs and uncertainty. Grounded in the author's own classroom approach to business statistics, the book reveals how to use data to understand the drivers of business outcomes, which in turn allows for data-driven business decisions. A basic, non-mathematical foundation in statistics is provided, outlining for readers the tools needed to link data with business decisions; account for uncertainty in the actions of others and in patterns revealed by data; handle data in Excel®; translate their analysis into simple business terms; and present results in simple tables and charts. The author discusses key data analytic frameworks, such as decision trees and multiple regression, and also explores additional topics, including: Use of the Excel® functions Solver and Goal Seek Partial correlation and auto-correlation Interactions and proportional variation in regression models Seasonal adjustment and what it reveals Basic portfolio theory as an introduction to correlations Chapters are introduced with case studies that integrate simple ideas into the larger business context, and are followed by further details, raw data, and motivating insights. Algebraic notation is used only when necessary, and throughout the book, the author utilizes real-world examples from diverse areas such as market surveys, finance, economics, and business ethics. Excel® add-ins StatproGo and TreePlan are showcased to demonstrate execution of the techniques, and a related website features extensive programming instructions as well as insights, data sets, and solutions to problems included in the material. The enclosed CD contains the complete book in electronic format, including all presented data, supplemental material on the discussed case files, and links to exercises and solutions. Data Driven Business Decisions is an excellent book for MBA quantitative analysis courses or undergraduate general statistics courses. It also serves as a valuable reference for practicing MBAs and practitioners in the fields of statistics, business, and finance.
