Western China ( simplified Chinese: 西部; traditional Chinese: 西部; pinyin: Zhōngguó Xībù, or rarely simplified Chinese: 西; traditional Chinese: 西; pinyin: Huáxī) is the west of China. In the definition of the Chinese government, Western China covers one municipality: Chongqing; six provinces: Sichuan, Guizhou, Yunnan, Shaanxi, Gansu, and Qinghai; and three autonomous regions: Tibet, Ningxia, and Xinjiang .

United States, but have often chosen to demonize America for perceived cultural and military imperialism. Especially under Communist rule, Chinese leaders have crafted and re-crafted portrayals of the United States according to the needs of their own agenda and the regime's self-image -- often seeing America as an antagonist and foil, but sometimes playing it up as a model. In *China Looks at the West*, Christopher A. Ford investigates what these depictions reveal about internal Chinese politics and Beijing's ambitions in the world today. In

particular, Ford emphasizes the importance of China's "return" to global preeminence in state images, which has become an essential concept in the regime's self-image and legitimacy. He also examines the history of Chinese intellectual engagement with America, surveying the ways in which Chinese elites have manipulated attitudes toward the United States, and revealing how leaders from Qing dynasty officials to Mao Zedong and from Hu Jintao to Xi Jinping have altered and reconstructed this narrative to support their own political agendas. Ford concludes the volume

Communist Party's power. How did Western, market-orientated, property-owning, liberal democracies go from being in a position of complete global hegemony in the early 1990s to the current crisis of confidence and loss of moral foundation? This book tells the story of the most successful trading nation of the early twenty-first century. It looks at how the Communist Party of China has retained and cemented its monopoly on political power

since China's accession to the World Trade Organization in December 2001. It is the most extraordinary economic success story of our time and it has reshaped the geopolitics not just of Asia but of the world. As China has come to dominate global manufacturing, its economic power has been translated into political power, and the West now has a global rival that is politically antithetical to liberal values. The supply-side deflation from allowing 750 million low-cost workers into the global trading system combined with the policy of inflation targeting by Western central

banks led to falling  
real incomes for many in the  
West and rising asset prices  
that have benefited the few.

Worse still, China's  
mercantilist model is now  
held up as a viable economic  
alternative. To have a  
fighting chance of  
protecting the freedoms of  
liberal democracies, it is  
of the utmost importance  
that we understand how the  
policy of indulgent  
engagement with China has  
affected Western society in  
recent years. Only then can  
the global trading system be  
reoriented for the mutual  
benefit of all nations.

For more than a century, no US adversary or coalition of adversaries - not Nazi Germany, Imperial Japan, or the Soviet Union - has ever reached sixty percent of US GDP. China is the sole exception, and it is fast emerging into a global superpower that could rival, if not eclipse, the United States. What does China want, does it have a grand strategy to achieve it, and what should the United States do about it? In *The Long Game*, Rush Doshi draws from a rich base of Chinese

primary sources, including decades worth of party documents, leaked materials, memoirs by party leaders, and a careful analysis of China's conduct to provide a history of China's grand strategy since the end of the Cold War. Taking readers behind the Party's closed doors, he uncovers Beijing's long, methodical game to displace America from its hegemonic position in both the East Asia regional and global orders through three sequential "strategies of displacement." Beginning in the 1980s, China focused for two decades on "hiding capabilities and biding time." After the 2008 Global

Financial Crisis, it became more assertive regionally, following a policy of "actively accomplishing something." Finally, in the aftermath populist elections of 2016, China shifted to an even more aggressive strategy for undermining US hegemony, adopting the phrase "great changes unseen in century." After charting how China's long game has evolved, Doshi offers a comprehensive yet asymmetric plan for an effective US response. Ironically, his proposed approach takes a page from Beijing's own strategic playbook to undermine China's ambitions and strengthen American

the fate of nations, and the great questions of war and peace. A troubled but rising China is now challenging America's supremacy, and the ambitions of other Asian powers – including Japan, North Korea, India, and Pakistan – have the potential to shake the whole world. Meanwhile the West is struggling with economic malaise and political populism, the Arab world is in turmoil, and Russia longs to reclaim its status as a great power. As it becomes clear that the West's historic power and influence is receding, Gideon Rachman offers a road map to the turbulent process that will
