This fascinating chronicle of how the character of American society revealed itself under the duress of World War II "place(s) today's myriad social traumas and dislocations in perspective." -- George Will, Washington Post The Second World War exists in the American historical imagination as a time of unity and optimism. In 1942, however, after a series of defeats in the Pacific and the struggle to establish a beachhead on the European front, America seemed to be on the brink of defeat and was beginning to splinter from within. Exploring this precarious moment, Tracy Campbell paints a portrait of the deep social, economic, and political fault lines that pitted factions of citizens against each other in the post-Pearl Harbor era, even as the nation mobilized, government-aided industrial infrastructure blossomed, and parents sent their sons off to war. This captivating look at how American society responded to the greatest stress experienced since the Civil War reveals the various ways, both good and bad, that the trauma of 1942 forced Americans to redefine their relationship with democracy in ways that continue to affect us today.

The world has seen dramatic changes since the publication of the first edition of The Oxford Companion to Politics of the World in 1993. In the post-Cold War world, globalization now offers wealth and opportunities on a broader scale, as well as greater international harmony, but threatens to reinforce the advantage gap between wealthy and poor regions and intensify environmental degradation. Conflict and squalor—expressed in brutal brushfire wars, epidemics, and chronic underdevelopment—vie with equally dramatic accounts of growth and democracy associated with a liberal political order and the global diffusion of trade, investment, and communications. Drawing on the breadth of the first edition, this updated edition reflects the changing world with a reassessment of many of the core themes of the Companion, and new articles on the people, concepts, and events that have shaped the world since 1993. The second edition includes biographies of Kofi Annan, Tony Blair, Bill Clinton, and Gerhard Schröder; articles on events such as the Rwandan Genocide and the war in Kosovo; and coverage of international trade developments such as NAFTA and the World Trade Organization. Eighty-seven of the 672 articles in the Second Edition are completely new; most others are thoroughly revised. This edition also features a substantial new set of articles, a dozen essays on critical issues written by influential figures. Recognizing the importance of including varying viewpoints, the editors have commissioned these essays to provide an informed and often passionate debate on controversial topics. Discussions include Lantieri Guimier and Glenn Loury on Affirmative Action; Francis Fukuyama and Milton Fisk on the Limits of Liberal Democracy; and Lloyd Axworthy and John Bolton on the United Nations. The contributors discuss nearly every nation in the world, including extensive information on institutions, political parties, leaders, and the sources of political mobilization and conflict. The volume also includes biographies of more than seventy-five political leaders and thinkers who have shaped the contemporary political world. Articles include detailed discussions of critical historical developments and events, concepts, international law, and organizations. The Oxford Companion to Politics of the World, Second Edition is an accessible, timely, thought-provoking, and comprehensive reference that captures the complexity and vitality of contemporary world affairs.

Many U.S. Christians were profoundly moved by the liberation struggles in Central America in the 1980s. Most learned about the situation from missionaries who had worked in the area and witnessed the repression firsthand. These missionaries, Sharon Erickson Nepstad shows, employed the institutional and cultural resources of Christianity to seize the attention of American congregations and remind them of the moral obligations of their faith. Drawing on archival data and in-depth interviews with activists in ten separate solidarity organizations around the country, Nepstad offers a rich analysis of the experiences of religious leaders and church members in the solidarity movement. She explores the moral meaning of protest and the ways in which clergy used religious rituals, martyr stories, and biblical teachings to establish a link between faith and activism. She looks at the factors that transformed missionaries into skilled leaders who were able to translate the Central American conflicts into Christian themes and a religious language familiar to U.S. congregations. She also offers insights into the unique challenges of organizing on the transnational level and shows how the solidarity movement made U.S. policy towards Central America one of the most hotly contested issues in American politics during the 1980s. Unpacking the implications of her study for the field of collective action, Nepstad stresses the importance of the individual human agents who shape, and are shaped by, the structures and cultures in which they operate. She argues that working in and through the church gave supporters of solidarity moral credibility as well as a rich source of symbolic, human, and material resources that enabled them to reach across national borders, motivating others to act upon their deeply held moral convictions. Shedding new light on the genesis and evolution of this important activist movement, Convictions of the Soul will be of interest to students and scholars of social movements, religion, and politics.
