The Seventh Edition of COMPARATIVE POLITICS IN TRANSITION combines a thematic framework with a country-by-country approach to provide a thoughtful and effective introduction to Comparative Politics that is appropriate for students new to the study of political science. The author uses an arenas classification to organize and frame the systematic comparative analysis, rather than the traditional three worlds framework. This classification more accurately reflects the contemporary political, economic, and social realities of different political systems, allowing the author to provide historical, theoretical, and conceptual background through ten in-text country case studies. Unlike most other comparative politics texts, McCormick provides a balanced study of the Western and non-Western world and explores the politics and government of Islam and of failed states. Jack Snyder is a leading American international relations scholar with an international reputation for his research on IR theory and US Foreign policy. This book collects many of his most important essays into a single volume. Exploring a liberal realist theory of international politics, the book is arranged around three key subject areas: Anarchy and Its Effects The Challenges of Democratic Consolidation Empire and the Promotion of a Liberal Order With a new introduction to frame the selected essays, this collection examines how developing nations evolve political systems, and fit into a world dominated by liberal-democracies. It looks to the future for the current dominant powers in a changing world of international relations and at the challenges to their leadership. Featuring a new conclusion, developed from the assembled chapters, this is a fascinating and vital collection of scholarship from one of the most influential theorists of his generation. Power and Progress is an invaluable text for students and scholars of international relations, and those interested in the debates on liberalism and realism, and comparative politics.

In Regulatory Politics in Transition Marc Eisner argues that to understand fully the importance of regulatory policy we need to survey the critical policy shifts brought about during the Progressive period, the New Deal, and the contemporary period. Eisner adopts a regulatory regime framework to address the combination of policy change and institutional innovation across

multiple policies in each period. For each of these periods Eisner examines economic structural changes and the prevailing political economic and administrative theories that conditioned the design of new policies and institutions. Throughout, Eisner adds a valuable historical dimension to the discussion of regulation, by showing how policies and institutions were shaped by particular historical and political circumstances. The new edition examines how the efficiency regime of the 1980s found a new expression in the regulatory reinvention during the Clinton presidency. Moreover, it explores the impact of globalization trends and international regimes upon the politics of regulation and asks whether a new global regime is on the horizon.

Most books on the Caucasus and Central Asia are country-by-country studies. This book, on the other hand, fills a gap in Central Eurasian studies as one of the few comparative case study books on Central Eurasia, covering both the Caucasus and Central Asia; it considers key themes right across the two regions highlighting both political change and continuity. Comparative case study chapters, written by regional experts from a variety of methodological backgrounds, provide historical context, and evaluate Soviet political legacies and emerging policy outcomes. Key topics include: the varied types and sources of authoritarianism; political opposition and protest politics; predetermined outcomes of post-Soviet economic choices; social and stability impacts of natural resource wealth; variations in educational reform; international norm influence on gender policy and the power of human rights activists. Overall, the book provides a thorough, up-to-date overview of what is increasingly becoming a significant area of concern.
