The engines were also sold for marine and stationary applications. In a 1938 reorganization, Winton Engine Corporation became the GM Cleveland Diesel Engine Division, and GM's Detroit Diesel Engine Division began production of smaller (50–149 cu in (0.8–2.4 l) per cylinder) diesel engines. Locomotive engines were moved under the GM Electro ...

The Chevrolet 153 cu in engine was an inline-four engine designed in the early 1960s for use in the Chevy II. It is a four-cylinder variant of the third generation Chevrolet straight-six. After 1970 GM ceased production of the 153 engine in North America because of low demand, but the engine continued to be used in cars in other markets around the world, notably South Africa and Brazil. The engine was also standard equipment in the Jeep DJ-5A—used by the United States Postal Service ...

### ~~Video #1 Tutorial Rebuilding the CY 23CC Engine - YouTube~~

An H engine is a piston engine comprising two separate flat engines (complete with separate crankshafts) stacked vertically and connected to a common output shaft. The name "H engine" is due to the engine blocks resembling a sideways letter "H" when viewed from the front. The H engine is a relatively rare layout, with its main use being in aircraft engines during the 1930s and 1940s.
