This second volume of Professional Piano Teaching is designed to serve as a basic text for a second-semester or upper-division piano pedagogy course. It provides an overview of learning principles and a thorough approach to essential aspects of teaching intermediate to advanced students. Special features include discussions on how to teach, not just what to teach; numerous musical examples; chapter summaries; and suggested projects for new and experienced teachers. Topics: * teaching students beyond the elementary levels * an overview of learning processes and learning theories * teaching transfer students * preparing students for college piano major auditions * teaching rhythm, reading, technique, and musicality * researching, evaluating, selecting, and presenting intermediate and advanced repertoire * developing stylistic interpretation of repertoire from each musical period * developing expressive and artistic interpretation and performance * motivating students and providing instruction in effective practice * teaching memorization and performance skills

E. H. Gombrich's Little History of the World, though written in 1935, has become one of the treasures of historical writing since its first publication in English in 2005. The Yale edition alone has now sold over half a million copies, and the book is available worldwide in almost thirty languages. Gombrich was of course the best-known art historian of his time, and his text suggests illustrations on every page. This illustrated edition of the Little History brings together the pellucid humanity of his narrative with the images that may well have been in his mind's eye as he wrote the book. The two hundred illustrations—most

of them in full color—are not simple embellishments, though they are beautiful. They emerge from the text, enrich the author's intention, and deepen the pleasure of reading this remarkable work. For this edition the text is reset in a spacious format, flowing around illustrations that range from paintings to line drawings, emblems, motifs, and symbols. The book incorporates freshly drawn maps, a revised preface, and a new index. Blending high-grade design, fine paper, and classic binding, this is both a sumptuous gift book and an enhanced edition of a timeless account of human history.

This major contribution to contact period studies points to the Lasley Vore site in modern Oklahoma as the most likely first meeting place of Plains Indians and Europeans more than 300 years ago. In 1718, Jean-Baptiste B é nard, Sieur de la Harpe, departed St. Malo in Brittany for the New World. La Harpe, a member of the French bourgeoisie, arrived at Dauphin Island on the Gulf coast to take up the entrepreneurial concession provided by the director of the French colony, Jean Baptiste LeMoyne de Bienville. La Harpe's charge was to open a trading post on the Red River just above a Caddoan village not far from present-day Texarkana. Following the establishment of this post, La Harpe ventured farther north to extend his trade market into the region occupied by the Wichita Indians. Here he encountered a Tawakoni village with an estimated 6,000 inhabitants, a number that swelled to 7,000 during the ten-day visit. Despite years of ethnohistoric and archaeological research, no scholar had successfully established where this important meeting took place. Then in 1988, George Odell and his crew surveyed and excavated an area 13 miles south of Tulsa, along the Arkansas River, that revealed undeniable association of Native American habitation refuse with 18th-century European trade goods. Odell here presents a full account of the presumed location of the Tawakoni village as revealed through the analysis of excavated materials from nine specialist collaborators. In a strikingly well-written narrative report, employing careful study and innovative analysis supported by appendixes containing the excavation data, Odell combines documentary history and archaeological evidence to pinpoint the probable site of the first European contact with North American Plains Indians.

The purpose of this manual is to provide clear and helpful information for maintaining gravel roads. Very little technical help is available to small agencies that are responsible for managing these roads. Gravel road maintenance has traditionally been "more of an art than a science" and very few formal standards exist. This manual contains guidelines to help answer the questions that arise concerning gravel road maintenance such as: What is enough surface crown? What is too much? What causes corrugation? The information is as nontechnical as possible without sacrificing clear guidelines and instructions on how to do the job right.

The award-winning author of 23 Things They Don't Tell You About Capitalism outlines the real-world processes of the global economy while explaining how to better understand the strengths and weaknesses of key economics theories to better navigate today's interconnected world.

A new edition of the bestselling comprehensive history of the world from the perspective of struggling peoples throughout the ages—with a foreword by Howard Zinn From the earliest human societies to the Holy Roman Empire, from the Middle Ages to the Enlightenment, from the Industrial Revolution to the end of the twentieth century, Chris Harman provides a brilliant and comprehensive history of the human race. Eschewing the standard accounts of "Great Men," of dates and kings, Harman offers a groundbreaking counter-history, a breathtaking sweep across the centuries in the tradition of "history from below." In a fiery narrative, he shows how ordinary men and women were involved in creating and changing society and how conflict between classes was often at the core of these developments. While many scholars see the victory of capitalism as now safely secured, Harman explains the rise and fall of societies and civilizations throughout the ages and demonstrates that history moves ever onward in every age. This magisterial study is essential reading for anyone interested in how society has changed and developed and the possibilities for further radical progress. "I have had many people ask me if there is a book which does for world history what my book A People ' s History of the United States does for this country. I always responded that I know of only one book that accomplishes this extremely difficult task, and that is Chris Harman ' s A People ' s History of the World." —Howard Zinn
