Case Studies on Diversity and Social Justice Education offers pre- and in-service educators an opportunity to analyze and reflect upon a variety of realistic case studies related to educational equity and social justice. The accessibly written cases allow educators to practice the process of

considering a range of contextual factors, checking their own biases, and making immediate- and longer-term decisions about how to create and sustain equitable learning environments for all students. This revised edition adds ten new cases to offer greater coverage of elementary education, as well as topics such as body-shaming, Black Lives Matter, and transgender oppression. Existing cases have been updated to reflect new societal contexts, and streamlined for ease-of-use. The book begins with a seven-point process for examining case studies. Largely lacking from existing case study collections, this framework guides readers through the process of identifying, examining, reflecting on, and taking concrete steps to resolve challenges related to diversity and equity in schools. The

cases themselves present everyday examples of the ways in which racism, sexism, homophobia and heterosexism, class inequities, language bias, religious-based oppression, and other equity and diversity concerns affect students, teachers, families, and other members of our school communities. They involve classroom issues that are relevant to all grade levels and content areas, allowing significant flexibility in how and with whom they are used. Although organized topically, the intersections of these issues are stressed throughout the cases, reflecting the complexities of real-life scenarios. All cases conclude with a series of questions to guide discussion and a section of facilitator notes, called 'Points for Consideration.' This unique feature provides valuable

incorporating current events into classroom discussion, navigating their own stigmatized or privileged identities, dealing with bias in teaching evaluations, and engaging in self-care.

Current understandings of ageing and diversity are impoverished in three main ways. Firstly, with regards to thinking about what inequalities operate in later life there has been an excessive preoccupation with economic resources. On the other hand, less attention has been paid to cultural norms and values, other resources, wider social processes, political participation and community engagement. Secondly, in terms of thinking about the 'who' of inequality, this has so far been limited to a very narrow range of minority populations. Finally, when considering the 'how' of

inequality, social gerontology's theoretical analyses remain under-developed. The overall effect of these issues is that social gerontology remains deeply embedded in normative assumptions which serve to exclude a wide range of older people. Ageing, Diversity and Equality aims to challenge and provoke the above described normativity and offer an alternative approach which highlights the heterogeneity and diversity of ageing, associated inequalities and their intersections. The importance of the book lies in the way it discusses possible ways for early childhood education to work with diversity and language in order to allow inclusion and social justice for all children. freedom where young people – especially those who are marginalized – can learn that they have a voice and the power to change their world for the better. Drawing on the work of US philosopher Nancy Fraser, the book examines issues of justice and schooling in relation to three dimensions: political, cultural and economic. While its focus is on research within three Australian case study schools, the book provides an international perspective of these dimensions of justice in western education contexts as they impact on the schooling performance of marginalized students. Towards greater equity for these students, the book presents a comprehensive scaffold for thinking about and addressing issues of schooling, diversity and social justice. Through

practical examples from the case study research, the book illustrates the complexities and possibilities associated with schools providing inclusive environments where marginalized voices are heard (political justice), where marginalized culture is recognized and valued (cultural justice) and where marginalized students are supported to achieve academically towards accessing the material benefits of society (economic justice).
