The Manual provides guidance for compliance with the County of San Mateo Stormwater and Drainage Ordinance for all stages of the development process, from design through permitting, construction, and post-construction. The Manual is intended only for use by projects in unincorporated County areas. Figure 1-1. Watersheds of San Mateo County

DRAINAGE MANUAL - San Mateo County, California

A storm sewer system is a drainage system (existing and/or proposed) consisting of a series of at least two interconnecting pipes and two structures (drop inlets, manholes, junction boxes, etc) designed to intercept and convey stormwater runoff from specific storm event without surcharge. An exception to this general rule is: one or more cross drain pipes connected by one or more drop inlets, "hydraulically designed" to function as a culvert(s) and not connected to a storm drain system.
