Economic Evaluation Overview

Economic evaluation is a method of providing decision-makers with information about the opportunity cost of the decisions that could be made, where opportunity cost is the benefit we would have obtained had the resources used to provide one treatment been used to provide another instead, or more strictly the benefit we would have obtained had we used the resources for their next best alternative use.

Economic Evaluation - an overview | ScienceDirect Topics

Economic evaluation is the process of measuring cost effectiveness. An economic evaluation will measure two parameters—cost and outcome (effect). Because two parameters are measured, the results of an economic evaluation will not necessarily tell you which treatment option is " better " in the same way that a clinical trial might.
