Although it is based on toxicology, environmental toxicology draws heavily on principles and techniques from other fields, including biochemistry, cell biology, developmental biology, and genetics. Among its primary interests are the assessment of toxic substances in the environment, the monitoring of environments for the presence of toxic substances, the effects of toxins on biotic and abiotic components of ecosystems, and the metabolism and biological and environmental fate of toxins.

Environmental Toxicology - Wiley Online Library

Environmental pollution is the discharge of material, in any physical state, that is dangerous to the environment or human health. Most industrialized and developing countries, and many intergovernmental organizations, have developed maximum exposure values for pollutants.

Environmental Toxicology | Encyclopedia.com

Environmental Science and Pollution Research (ESPR) serves the international community in all areas of Environmental Science and related subjects with emphasis on chemical compounds. It reports from a broad interdisciplinary outlook.

Environmental Science and Pollution Research | Home

The Master ' s Degree in Environmental Contamination and Toxicology will train you as a professional in the biological assessment of the health of ecosystem, both marine and fresh water, and terrestrial.

Master in Environmental Contamination and Toxicology ...

Pollution and toxicology is an inter-disciplinary field of science concerned with the investigation of the destructive impacts of various substance, organic and physical entities on living life forms.

Aquatic Pollution and Toxicology - iMedPub

These include water, air, and soil pollution, organic and inorganic pollution, risk assessment, human and environmental health, environmental biotechnology, global ecology, mathematics and computing as related to environmental pollution, environmental modelling, environmental chemistry and physics, biology, toxicology, conservation and biodiversity, agricultural sciences, pesticides ...

Environmental Pollution - Springer

Broadly, environmental pollution consists of six basic types of pollution, i.e. air, water, land, soil, noise, and light. When people think of environmental pollution, most focus on fossil fuel and carbon emissions, but there are different contributing factors. Chemical pollution in bodies of water contributes to illnesses.
