Start your review of Filial Therapy: Strengthening Parent-Child Relationships Through Play. Write a review. Aug 13, 2008 Tanya rated it liked it. I am reading this book for a class I will be taking in the fall. I can't recommend it to anyone who isn't going into clinical work, but so far I really like it. It makes sense and puts parents where ...

Filial Therapy: Strengthening Parent-Child Relationships...

Filial therapy is a type of therapy designed to improve or strengthen the parent-child relationship. It was first conceptualized and put into practice back in the late 1950s and early 1960s by Drs. Bernard and Louise Guernsey, in response to a lack of counselors and therapists trained to work with children during that time.

Filial Therapy 101— Strengthening the parent-child...

Filial therapy combines psychoeducational, empowerment, and play therapy methods that actively involve parents in their child's treatment. This comprehensive how-to-do-it guide provides applied filial therapy techniques for use with 3- to 12-year-old children who are experiencing a wide range of clinical problems.

Certificate / Diploma in Parent-Child Therapy | Parent...

Filial therapy is a form of therapy for children where a therapist teaches non-directive play therapy techniques to a parent, who then has special play sessions with the child. Instead of engaging directly with the child, the therapist coaches the parent, giving feedback and support. Filial Therapy is an evidence-based treatment for children.

Parent-Child Relationship | Therapy based on the parent...

Since play is the area where children are most open, the easiest way to reach children is through play. Therefore " Filial Therapy " , is a therapy method that aims to strengthen the parent-child relationship by using the game. The child starts exploring, learning and being happy with play, starting from infancy.

Filial Therapy – CBT Cognitive Behavioral Therapy – CBT...

Filial Therapy is a specialised therapeutic approach that focuses on teaching parents/carers relational skills that promote positive parenting, by strengthening child-parent relationships and optimising positive attachments in the long term. Filial Family Therapy is suited to families with children from 3-13 years of age who are experiencing social, emotional or behavioural difficulties, but is also beneficial for families who may just simply wish to improve the quality of their relationships.
