General Physics I Laboratory
Manual lab should be
completed before the lab and
turned in at the beginning
of the lab. See the course
syllabus for more details.
In some labs, you may also
be required to complete
experimental predictions and
enter them in your lab
manual before you come to
lab. Sometimes, you must
watch an online video. Your
TA will discuss this with
you when necessary.

2016 - Vanderbilt University

Thus this lab manual describes experiences (“labs”) that are caricatures of experimental physics. Our labs will typically emphasize thorough preparation, an underlying mathematical model of nature, good experimental technique, analysis of data (including the significance of error)...the basic prerequisites for doing science.

Relationships between position, velocity, acceleration, and time are studied. This lab focuses on the one dimensional case where each quantity can be considered as a scalar. Acceleration is taken to be constant while the mass varies. Download: Motion 2.pdf

AP Physics 1 and 2 Inquiry-Based Lab Manual

B. General Remarks. The aim of a lab course in the Advanced Physics Teaching Lab is:

- Learn physics by proper preparation for the experiments and by doing.
- Learn experimental techniques. All theories have to be proven by experiments and new discoveries mostly come from very advanced measurements.

General Physics Laboratory Manual - AbeBooks

This is the laboratory manual for the first course in the General Physics sequence. The course covers classical mechanics and is required of all students in science and engineering programs at Illinois Tech. All of the manuals are in Adobe Acrobat Portable Document Format (PDF). Departmental policy is that these documents can be viewed but not printed in the laboratory rooms, so please print the manual beforehand.

Answers
This lab manual provides students with the basic knowledge needed to successfully participate in a physics laboratory course for non-physics majors. In part A, the manual gives step-by-step instructions about how to use the common measurement hardware LabQuest2, and the video analysis program ImageJ. Through this manual, students learn how to create measurement graphs with Microsoft Excel and how to analyze measurement data, including error analysis. In part B, students find lab experiments on the topics of motion, force, Newton's laws, torque, energy, and
