Good Calories, Bad Calories: Fats, Carbs, and the Controversial Science of Diet and Health is a 2007 book by science journalist Gary Taubes. Taubes argues that the last few decades of dietary advice promoting low-fat diets has been consistently incorrect. Taubes contends that carbohydrates, specifically refined carbohydrates like white flour, sugar, and starches, contribute to obesity, diabetes, heart disease, and other ailments. Taubes posits a causal link between carbohydrates and cancer, as w

~~Good Calories, Bad Calories - Wikipedia~~

Good Calories, Bad Calories (2007) [released as The Diet Delusion in the U.K.] In Good Calories, Bad Calories, Taubes tries to bury the idea that a low-fat diet promotes weight loss and better health. Obesity is caused, he argues, not by the quantity of calories you eat but by the quality. Carbohydrates, particularly refined ones like white bread and pasta, raise insulin levels, promoting the storage of fat.

~~Good Calories vs. Bad Calories | IdealShape~~

Overview. For decades we have been taught that fat is bad for us, carbohydrates better, and that the key to a healthy weight is eating less and exercising more. Yet despite this advice, we have seen unprecedented epidemics of obesity and diabetes. Taubes argues that the problem lies in refined carbohydrates, like white flour, easily digested starches, and sugars, and that the key to good health is the kind of calories we take in, not the number.
