minimizing leaf loss and quicken dry-down! With lower horsepower requirements and operating speeds, a Rhino hay tedder is useful on a farm of any size! Our tedders have six steel tines on each rotor, with independent height adjustment for comfortable raking!

~~Hay Tedders — RhinoAg~~

As with all Massey Ferguson hay tedders, the forage is picked up by the tines and turned gently, without damage. A light, loose and well mixed mat of forage is created, to help ensure a top quality end-product. With the central edge spreading device which is fitted as standard, edges of fields no longer present any problems.

~~Tedder~~

A tedder is a farm tool used to make hay. The tedder has been around for over a hundred years. The exact year it was invented is up for debate, but the consensus is that it was developed sometime in the late 1800s. The Function of a Tedder Tedders spread and turn loose hay out in the field. By turning over loose hay, it's aerated. Aeration means it exposes the underside to the sun and air ...
