

Geo-information technology can be of considerable use in disaster management, but with considerable challenge in integrating systems, interoperability and reliability. This book provides a broad overview of geo-information technology, software, systems needed, currently used and to be developed for disaster management. The text invites discussion on systems and requirements for use of geo-information under time and stress constraints and unfamiliar situations, environments and circumstances.

This book presents the selected peer-reviewed proceedings of the International Conference on Innovative Engineering Design (ICOIED 2020). The contents provide a multidisciplinary approach for the development of innovative product design and their benefits for the society. The book presents latest advances in various fields like design process, service development, micro/nano technology, sensors and MEMS, and sustainability in engineering design. This book can be useful for students, researchers, and professionals interested in innovative product/process design and development.

"Examines the antagonistic relationship between India and Pakistan and the territorial and identity issues that have divided them for sixty-five years, and possibly the next thirty-five, and offers ways the tension between the two might be ameliorated ifnot solved, including a more active role for the United States"--Provided by publisher.

Aimed at anyone seeking to understand the causes and distributions of excessive police violence—and to develop interventions to end it—From Enforcers to Guardians frames excessive police violence so that it can be understood, researched, and taught about through a public health lens.
