author. Over the years, Jeanne E. Ormrod has received many unsolicited e-mail messages from students who tell her how much they've enjoyed and appreciated previous editions of Human Learning.

Written in a conversational and engaging manner, *How We Think and Learn* introduces readers to basic principles and research findings regarding human cognition and memory. It also highlights and debunks twenty-eight common misconceptions about thinking, learning, and the brain. Interspersed throughout the book are many short do-it-yourself exercises in which readers can observe key principles in their own thinking and learning. All ten chapters end with concrete recommendations - both for readers' own learning and for teaching and working effectively with others. As an accomplished researcher and writer, Jeanne Ellis Ormrod gives us a book that is not only highly informative but also a delight to read.

Check with the seller prior to purchase. -- Unlike most educational psychology books, which take one theory at a time, explain its assumptions and principles and then identify implications for educational practice, *Essentials of Educational Psychology* focuses more on the commonalities than the differences among theories, because although researchers from different traditions have approached human cognition and behavior from many different angles, they sometimes arrive at more or less the same conclusions. This book integrates ideas from many theoretical perspectives into a set of principles and concrete strategies that psychology as a whole can offer you. See for Yourself exercises will help you discover more about yourself as a thinker and learner and also help you come to a deeper and more personal understanding of educational psychology's core ideas.
