All her life Sheba has watched as her friends at school went out with a different boy every weekend and had fun. She watched as they kissed in the halls at school. She saw how they held hands. She hated having to sit back and watch the way the boys treated the girls. How they would call them all the time and ask them out. While she sat home alone in her bedroom. Sheba isn't allowed to have any contact outside of school with her friends. See Sheba is a werewolf, and it is strictly forbidden for her to be around the humans outside of school. Her father is Pack Master, the almighty Alpha, what he says goes. She is so tired of being lonely. All she wants is to get out of the house away from her pack and her father's rules. To go to the lake and party with her friends from school. She has to listen to them talk about what they did all week long, at the lake over the weekend. If only her father understood how it is. The pack males have all got their eyes on Sheba. But not the way she thinks. She thinks they're just watching her because her father tells them to. No sir, it's not like that at all. Soon one of them will be given her paw as their new mate. He makes them fight out in the woods so she can't see. The strongest one will win her. She will have no say in who will be her mate.

Endorsed by WJEC and written by experienced examiners David Burtenshaw and Sue Warn, this WJEC A2 Geography Student Unit Guide is the essential study companion for Unit G4: Sustainability. This full-colour book includes all you need to know to prepare for your unit exam: clear guidance on the content of the unit, with topic summaries, knowledge check questions and a quick-reference index exam advice throughout, so you will know what to expect in the exam and will be able to demonstrate the skills required exam-style questions, with graded student responses, so you can see clearly what is required to get a better grade

of farm toys and experienced collectors and an affordable gift display along with your favorite farm toys.

Can drinking coffee help people live longer? What makes a stock's price go up? Why did you get the flu? Causal questions like these arise on a regular basis, but most people likely have not thought deeply about how to answer them. This book helps you think about causality in a structured way: What is a cause, what are causes good for, and what is compelling evidence of causality? Author Samantha Kleinberg shows you how to develop a set of tools for thinking more critically about causes. You'll learn how to question claims, identify causes, make decisions based on causal information, and verify causes through further tests. Whether it's figuring out what data you need, or understanding that the way you collect and prepare data affects the conclusions you can draw from it, *Why* will help you sharpen your causal inference skills.
