The Interpersonal Process Approach (IPP) is a unique approach to individual therapy, which integrates an individual 's relational experiences, their thoughts about themselves, and their familial experiences to bring about an awareness of how these three domains impact one 's present circumstances. Through our life experiences, we all come to develop coping styles, or ways that we learn how to relate to others.

Interpersonal Process Approach - HopeWell Psychological

Interpersonal Process Therapy. In psychotherapy, I believe that the relationship between the client and the therapist is an essential component to client change. I utilize and integrate research based therapeutic interventions from cognitive and behavioral schools of thought. Also, the interpersonal process of therapy is the conceptual framework which guides my work.

Interpersonal Psychotherapy | Psychology Today

Interpersonal psychotherapy is a brief, attachment-focused psychotherapy that centers on resolving interpersonal problems and symptomatic recovery. It is an empirically supported treatment that follows a highly structured and time-limited approach and is intended to be completed within 12–16 weeks. IPT is based on the principle that relationships and life events impact mood and that the reverse is also true. It was developed by Gerald Klerman and Myrna Weissman for major depression in the ...
