These numbers may look easy to calculate, some numbers really are. Like the square of 15 (225), or square of 25 (625), or cube of 4 (64), or 3 4 (3 x 3 x 3 x 3 = 81).. But as the numbers go higher and the exponential power increases, finding the right answer starts becoming more and more difficult.

~~Mathematics Power Calculator | Math Calculators | iCalculator~~
Power & Sample Size Calculator. Use this advanced sample size calculator to calculate the sample size required for a one-sample statistic, or for differences between two proportions or means (two independent samples). More than two groups supported for binomial data. Calculate power given sample size, alpha, and the minimum detectable effect (MDE, minimum effect of interest).

~~Sample Size Calculator—calculates power & sample size ...~~

The reactive power Q in volt-amps reactive (VAR) is equal to the voltage V in volts (V) times the current I in amps (A) time the sine of the complex power phase angle (θ): $Q \text{ (VAR)} = V \text{ (V)} \times I \text{ (A)} \times \sin \theta$. The power factor (FP) is equal to the absolute value of the cosine of the complex power phase angle (θ): $PF = |\cos \theta|$

Russia is the world's foremost energy superpower, rivaling Saudi Arabia as the world's largest oil producer and accounting for a quarter of the world's exports of natural gas. Russia's energy reserves account for half of the world's probable oil reserves and a third of the world's proven natural gas reserves. Whereas military might and nuclear weapons formed the core of Soviet cold war power, since 1991 the Russian state has viewed its monopolistic control of Russia's energy resources as the core of its power now and for the future. Since 2005, the international news has been filled with Russia's repeated demonstrations of its readiness to use price, transit fees, and supply of gas and oil exports as punitive policy instruments against recalcitrant states that were formerly part of the Soviet Union, striking in turn the Ukraine, Georgia, Azerbaijan, Armenia, Belarus, and Lithuania. Orbán reveals for the first time in *Power, Energy, and the New Russian Imperialism* Russia's readiness to wield the same energy weapon against her neighbors on the west, all of them former Soviet satellite states but now EU and NATO member nations: the three Baltic nations and the five East European nations of Poland, Slovakia, Hungary, the Czech Republic, and Slovenia. Orbán shows how the Kremlin since 1991 has systematically used Russian energy companies as players in a concerted neo-mercantilist, energy-based foreign policy designed to further Russia's neo-imperial ambitions among America's key allies

in Central East Europe. Her unprecedented analysis is key to predicting Russia's strategic response to American negotiations with Poland and the Czech Republic to host the US missile shield. She also reveals the economic and diplomatic modus operandi by which Russia will increasingly apply its energy clout to shape and coerce the foreign policies of the West European members of the EU, as Russia's contribution to EU gas consumption increases from a quarter today to three-quarters by 2020. Orban proves that Russia's neo-mercantilist energy strategy in East Europe is not at all dependent on the person of Putin, but began under Yeltsin and continues under Medvedev, the former chairman of Gazprom.
