The development of leadership capacities addresses a vital and continuing need in communities and organizations as they attempt to adapt to a wide range of social, economic, environmental, and political changes. Leadership development activities that focus on building new skills and fostering new ideas directly shape local and organizational capacity. At the organizational level, leadership is a valued resource as organizations are faced with challenges of limited resources, funding, and other capacities. Community leadership operates within a different domain; an environment with different dynamics, structures, and goals. Community leadership is distinctive in that leaders often do not have formal training or authority to dictate and facilitate change. Instead, community leaders must rely on informal networks of diverse citizens, each with a unique local capacity, as the basis for change. This book brings together classic and contemporary articles drawn from Community Development. Divided into two sections, the book begins with a range of seminal leadership theory and conceptualization pieces. These have been instrumental in shaping leadership development in a wide range of settings. Following

Scores of books and articles have been written in the popular press and mainstream marketplace about leadership: who leaders are, what they do, and why they matter. Yet in academia, there is a dearth of rigorous research, journal articles, or doctoral programs focused on leadership as a discipline. Why do top business schools espouse mission statements that promise to "educate the leaders of the future"- yet fail to give leadership its intellectual due? The Handbook of Leadership Theory and Practice seeks to bridge this disconnect. Based on the Harvard Business School Centennial Colloquium "Leadership: Advancing an Intellectual Discipline" and edited by HBS professors Nitin Nohria and Rakesh Khurana, this volume brings together the most important scholars from fields as diverse as psychology, sociology, economics, and history to take stock of what we know about leadership and to set an agenda for future research. More than a means of getting ahead and gaining power, leadership must be understood as a serious professional and personal responsibility. Featuring the thinking of today's most renowned scholars, the Handbook of Leadership Theory and Practice will be a catalyst for elevating leadership to a higher intellectual plane - and help shape the research agenda for the next generation of leadership scholars.
