**Abstract.** Providing an alternative to psychoanalytically based descriptions, this major study presents a unique, new theoretical account of the way emotions and thought patterns interact in creating aesthetic effects in films. Using diverse examples, Torben Grodal shows how films activate effects in the viewer and how these effects are moulded by genres which determine the way in which characters will react in given situations.

~~Moving pictures: a new theory of film genres, feelings ...~~

Film, also called movie, motion picture or moving picture, is a visual art -form used to simulate experiences that communicate ideas, stories, perceptions, feelings, beauty, or atmosphere through the use of moving images. These images are generally accompanied by sound, and more rarely, other sensory stimulations.
