Munchausens Syndrome By Proxy Reconsidered**

Munchausen syndrome and Munchausen syndrome by proxy are now classified as "factitious disorder imposed on another" or FDIA in the Diagnostic and Statistical Manual of Mental Disorders (DSM-5). This change represents the belief that this disorder describes a behavioral pattern rather than an underlying psychiatric syndrome.

Munchausen Syndrome by Proxy: Definition, Symptoms, Traits ...

Factitious disorder imposed on another, also known as Munchausen syndrome by proxy, is a condition in which a caregiver creates the appearance of health problems in another person, typically their child. This may include injuring the child or altering test samples. They then present the person as being sick or injured. The behaviour occurs without a specific benefit to the caregiver. Permanent injury or death of the child may occur as a result of the disorder. The cause of FDIA is unknown. The p
