successful. She would be the one to take over his million-dollar businesses. She would become the unwavering compass and resilient caretaker of the Logan family -- whether she wanted to or not. But Belinda belonged only to herself. Flighty, flirtatious, and possessed of a beauty that promised her a privileged life, Belinda was lavished with attention. Mother and Father, family friends, boys from school, they all adored Belinda. And as she matured into a young woman, her beauty became even more haunting. The First Breath is an investigation into the pioneering fetal and neonatal care bringing a new generation into the world, who would not have lived if they had been born only a few decades ago. The First Breath explores the female experience of medicine and details the relationship mothers develop with doctors who hold not only life and death in their hands, but also the very possibility of birth. From the dawn of fetal medicine to neonatal surgery and the exploding field of perinatal genetics, The First Breath tells of fear, bravery and love. Olivia Gordon takes the reader behind the closed doors of the fetal and neonatal intensive care units, resuscitation rooms and operating theatres at some of the world's leading children's hospitals, unveiling the untold story of how doctors save

Decolonization and Feminisms in Global Teaching and Learning is a resource for teachers and learners seeking to participate in the creation of radical and liberating spaces in the academy and beyond. This edited volume is inspired by, and applies, decolonial and feminist thought – two fields with powerful traditions of critical pedagogy, which have shared productive exchange. The structure of this collection reflects the synergies

between decolonial and feminist thought in its four parts, which offer reflections on the politics of knowledge; the challenging pathways of finding your voice; the constraints and possibilities of institutional contexts; and the relation between decolonial and feminist thought and established academic disciplines. To root this book in the political struggles that inspire it, and to maintain the close connection between political action and reflection in praxis, chapters are interspersed with manifestos formulated by activists from across the world, as further resources for learning and teaching. These essays definitively argue that the decolonization of universities, through the re-examination of how knowledge is produced and taught, is only strengthened when connected to

feminist and critical queer and gender perspectives. Concurrently, they make the compelling case that gender and feminist teaching can be enhanced and developed when open to its own decolonization.
