In his seminal socio history of Punk, "England's Dreaming", Jon Savage makes the bald assertion that "Charles Radcliffe laid the foundation for the next twenty years of sub-cultural theory", referring in particular to his 1966 piece "the Seeds of Social Destruction" that appeared in the first of two issues of Radcliffe's co authored, insurrectionary street-zine, 'Heatwave' . Teddy Boys, Ton Up Kids, Mods and Rockers, Beats, Ban the Bombers, The Ravers (jazz heads) : Radcliffe argued that the bank holiday bust ups, the demos, the riots, the sex drugs n rock n' roll, these were all part of a "youth revolt... (that) has left a permanent mark on this society, has challenged assumptions and status, and been prepared to vomit its' disgust in the streets. The youth revolt has not always been comfortable, valid, to the point or helpful. It has however made its first stumbling political gestures with an immediacy that revolutionaries should not deny, but envy." Radcliffe joined the International Situationists within the year, alongside (English founder) Chris Gray, but by the time 1968 had ended, and youthful revolt had fed into wide pockets of political turmoil globally, Radcliffe had started to drift towards other poles of late 60s' counterculture. He ended the 60's in long hair and loon pants, banged up in a Belgian prison on hash smuggling charges. This epic (900 + pages) book follows Radcliffes' trials and tribulations from public school beginnings, into the 60's underground and the Mr Nice style large scale hash smuggling years (his friend, Howard Marks, pops up throughout) , on to prison, divorce, remarriage and beyond. It offers up important first hand perspectives on 60's / 70's counterculture, and an intimate portrait of a man who seemed to face the slings and arrows that fortune threw at him with a never ending supply of equanimity. And high grade hash.

The world's most popular spreadsheet program is now more powerful than ever, but it's also more complex. That's where this Missing Manual comes in. With crystal-clear explanations and hands-on examples, Excel 2013: The Missing Manual shows you how to master Excel so you can easily track, analyze, and chart your data. You'll be using new features like PowerPivot and Flash Fill in no time. The important stuff you need to know: Go from novice to ace. Learn how to analyze your data, from writing your first formula to charting your results. Illustrate trends. Discover the clearest way to present your data using Excel's new Quick Analysis feature. Broaden your analysis. Use pivot tables, slicers, and timelines to examine your data from different perspectives. Import data. Pull data from a variety of sources, including website data feeds and corporate databases. Work from the Web. Launch and manage your workbooks on the road, using the new Excel Web App. Share your worksheets. Store Excel files on SkyDrive and collaborate with colleagues on Facebook, Twitter, and LinkedIn. Master the new data model. Use PowerPivot to work with millions of rows of data. Make calculations. Review financial data, use math and scientific formulas, and perform statistical analyses.

As heard on NPR's This American Life "Absorbing . . . Though it's non-fiction, The Feather Thief contains many of the elements of a classic thriller." -Maureen Corrigan, NPR's Fresh Air "One of the most peculiar and memorable true-crime books ever." -Christian Science Monitor A rollicking true-crime adventure and a captivating journey into an underground world of fanatical fly-tiers and plume peddlers, for readers of The Stranger in the Woods, The Lost City of Z, and The Orchid Thief. On a cool June evening in 2009, after performing a concert at London's Royal Academy of Music, twenty-year-old American flautist Edwin Rist boarded a train for a suburban outpost of the British Museum of Natural History. Home to one of the largest ornithological collections in the world, the Tring museum was full of rare bird specimens whose gorgeous feathers were worth staggering amounts of money to the men who shared Edwin's obsession: the Victorian art of salmon fly-tying. Once inside the museum, the champion fly-tier grabbed hundreds of bird skins—some collected 150 years earlier by a contemporary of Darwin's, Alfred Russel Wallace, who'd risked everything to gather them—and escaped into the darkness. Two years later, Kirk Wallace Johnson was waft high in a river in northern New Mexico when his fly-fishing guide told him about the heist. He was soon consumed by the strange case of the feather thief. What would possess a person to steal dead birds? Had Edwin paid the price for his crime? What became of the missing skins? In his search for answers, Johnson was catapulted into a years-long, worldwide investigation. The gripping story of a bizarre and shocking crime, and one man's relentless pursuit of justice, The Feather Thief is also a fascinating exploration of obsession, and man's destructive instinct to harvest the beauty of nature.

At the XXIV General Assembly of the International Union of Geodesy and Geophysics (IUGG), held July 2-13, 2007 in Perugia, Italy, the International Association of Geodesy (IAG) also had its quadrennial General Assembly. The IAG - organized and contributed to several Union Symposia, as well as to Joint Symposia with other Associations. It also organized ve Symposia of its own, one dedicated to each of its four Commissions and a fifth dedicated to the Global Geodetic Observing System (GGOS). This volume contains the proceedings of these ve Symposia, which are listed below: Symposium GS001: Reference Frames Convener: H. Drewes Co-convener: A. Dermanis Symposium GS002: Gravity Field Convener: C. Jekeli Co-conveners: U. Marti, S. Okubo, N. Sneeuw, I. Tziavos, G. Vergos, M. Vermeer, P. Visser Symposium GS003: Earth Rotation and Geodynamics Convener: V. Dehant Co-convener: Chengli Huang Symposium GS004: Positioning and Applications Convener: C. Rizos Co-convener: S. Verhagen Symposium GS005: The Global Geodetic Observing System (GGOS) Conveners: M. Rothacher Co-conveners: R. Neilan, H.-P. Plag The Symposia were organized based on the structure of the IAG (i. e., one per Commission) and covered the three pillars of geodesy, namely geometry, Earth rotation, and gravity field, plus their applications. The inclusion of the Symposium on GGOS - which is no longer a project but a major component of the IAG - integrated all geodetic areas and highlighted the importance of multidisciplinary in, and for, geodetic research.
