Includes 30 one-page "shorts" about key events in world history, reproducible activity sheets, map, graph, and chart activities, extension activities, and assessments.

This very practical series will help adolescents and adults alike to understand mathematics as it relates to their everyday lives. Each book covers basic math concepts and skills before exploring the more specific topics. Clear explanations are followed by ample practice. Each section also has a pretest, a section review, and posttest.

Publisher's Note: Products purchased from 3rd Party sellers are not guaranteed by the Publisher for quality, authenticity, or access to any online entitlements included with the product. Perfect for any clinician short on time who needs to practice for oncology board exams, The Bethesda Review of Clinical Oncology is from the same authors who brought you the trusted and bestselling Bethesda Handbook of Clinical Oncology. It's packed with hundreds of disease-specific questions that are formatted just like an actual board review exam—so you can prep as effectively as possible and achieve test success.

Consists of reproducible activity worksheets with recipes and instructions for cooking a variety of foods. Designed to provide "Hands-on" activities to help students increase their reading comprehension and writing skills.

All the NT and Windows 2000 answers one needs are found in one complete, authoritative guide. Here are easy-access Q&As for virtually every key NT topic, including installation and bootup, system, user, and desktop configuration, backup and recovery, managing disks, and much more.

"All of the suggested ideas and approaches have been identified as best practices in reading, so educators can use them with confidence in their classrooms. Equally effective as a text for preservice educators, a manual for in-service teachers, and a resource for administrators, this in-depth, accessible book will lead to sharper skills and better outcomes for a wide range of struggling learners."--BOOK JACKET.

HIGHLY COMMENDED IN THE CARDIOLOGY CATEGORY, BMA AWARDS 2006! Specialist Training in Cardiology is written for those doctors starting their career in this specialty (or in general internal medicine). The text presents a succinct account of the subject concentrating on diagnostic techniques, treatment and management. Throughout extensive use is made of radiographs, drawings, lists and tables. The aim is to provide a 'bridge' between introductory undergraduate texts and the very large and expensive major reference works. Wherever possible evidence-based treatment options are given and referenced. A detailed list of further reading is also provided. Series

aimed at specialist registrar level Succinct style making use of bullet points, boxes, tables etc. Highly accessible four-colour design

This User's Guide is a resource for investigators and stakeholders who develop and review observational comparative effectiveness research protocols. It explains how to (1) identify key considerations and best practices for research design; (2) build a protocol based on these standards and best practices; and (3) judge the adequacy and completeness of a protocol. Eleven chapters cover all aspects of research design, including: developing study objectives, defining and refining study questions, addressing the heterogeneity of treatment effect, characterizing exposure, selecting a comparator, defining and measuring outcomes, and identifying optimal data sources. Checklists of guidance and key considerations for protocols are provided at the end of each chapter. The User's Guide was created by researchers affiliated with AHRQ's Effective Health Care Program, particularly those who participated in AHRQ's DEcIDE (Developing Evidence to Inform Decisions About Effectiveness) program. Chapters were subject to multiple internal and external independent reviews. More more information, please consult the Agency website: www.effectivehealthcare.ahrq.gov)
