Pictorial Communication In Real And Virtual Environments

picture of reality provided to us in bits and pieces by our senses and their scientific or technological enhancements. On the other hand, we also have an interest in pictures for communication-pictures to transmit information among ourselves as well as to and from our increasingly sophisti-cated information-processing machines. The geometric

Pictorial Communication: Pictures

Visual supports are a communication tool that can be used with autistic people. They can be used in most situations, are adaptable and portable. Visual supports can help to: provide structure and routine. encourage independence. build confidence. improve understanding. avoid frustration and anxiety. provide opportunities to interact with others.

Visual supports - Autism support - leading UK charity

The Picture Exchange Communication System, or PECS, allows people with little or no communication abilities to communicate using pictures. People using PECS are taught to approach another person and give them a picture of a desired item in exchange for that item. By doing so, the person is able to initiate communication.

The Picture Exchange Communication System (PECS)

Session. 6.6. Personal Experience. Christine Fincham; Summary. To explain the elements required to motivate quality communication and to show the importance of developing a pictorial communication system for my son Ian.
