likely to be more positive and its results are likely to be more useful if you build evaluation in from the start and make it an on-going activity. This includes planning the

~~Evaluation Planning: What is it and how do you do it?~~

Once the assessment and planning phases have been conducted, and interventions have been selected for implementation, the final stage of designing a workplace health program involves decisions concerning the monitoring and evaluation of program activities. Just as assessment data are critical for evidenced-based program planning and implementation, so too is evaluation to prove that workplace health interventions have been

~~Planning health promotion programs: introductory workbook~~
The program logic model is a generic one, which can be used to inform program planning. An evaluation framework which is built on a program logic model will start with those components of the logic model identified above, and then work through each step of the model to identify whether the assumptions on which the program were built were sound, whether the intended consequences of each logical step occurred and, if not,

~~Department of Health | 3.5
Evaluation frameworks~~

Evaluation and Program Planning is based on the principle that the techniques and methods of evaluation and planning transcend the boundaries of specific fields and that relevant contributions to these areas come from people representing many different positions, intellectual traditions, and interests. In order to further the development of evaluation and planning, we publish articles from the private and public sectors in a wide range of areas: organizational development and behavior ...
