Planning And

Scheduling
The planning horizon depends on the leads times for manufacturing and purchasing. Time-phased MRP is achieved by exploding the bill of materials, adjusting for quantity on hand or on order and offsetting the net requirements for lead times. MRP, being at the detailed level, also considers finite capacity through capacity

to minimize the production time and costs, by telling a production facility when to make, with which staff, and on which equipment. But it's an academic purpose.

From a business point of view, the first priority purpose is to keep the customer's due date.
