Beautifully illustrated in full color, POTTER'S ATLAS OF FETAL AND INFANT PATHOLOGY addresses all aspects of pathology in the prenatal period and the first two years of life, including complicated pregnancies, spontaneous abortion, placental pathology, prenatal diagnosis of abnormalities, fetal/infant death, and all disorders affecting the full-term neonate. The atlas may be

Access Free Potters Pathology Fetus Infant Child 2 Volume

used as a complement to the major reference in the field, POTTER'S PATHOLOGY OF THE FETUS AND INFANT, or as a stand-alone book for the pathologist who requires only the most critical information. A concise, visual reference, the atlas contains over 1,000 color illustrations from the personal collections of leading pediatric pathologists. It's an essential resource for any pathologist who sees pediatric cases. Covers key aspects of fetal and infant pathology in a concise, efficient manner for general pathologists who see pediatric cases. Covers the entire field of fetal and infant pathology. Follows the organization of POTTER'S PATHOLOGY OF THE FETUS AND INFANT, so it may be used alone or as a color pictorial complement to the larger text. Includes over 1000 illustrations, most in color, to help pathologists make diagnoses based on visual clues.

This volume addresses all aspects of foetal and infant pathology from conception through the first year of life, including complicated pregnancies, abortion, placental pathology and disorders affecting the full-term infant. Normal growth and development are addressed first, followed by a thorough look at foetal and infant death and its causes. General problems affecting the foetus and infant are covered in separate chapters, followed by discussions of disorders affecting major organ systems. This edition retains an emphasis on clinicopathologic correlations and, molecular development and genetics are stressed, in keeping with their prominent role in the origin of birth defects and other abnormalities.

Causes & pathogenesis of birth defects pathology of the placenta teratogenic disruptions coagulation disorders.
