Health education can be defined as the principle by which individuals and groups of people learn to behave in a manner conducive to the promotion, maintenance, or restoration of health. However, as there are multiple definitions of health, there are also multiple definitions of health education.

Health education - Wikipedia

Education will help patients understand their condition, how to effectively use any medications or medical equipment required, and how to perform any necessary self-care. It must be ongoing, interactive, and consistent with the patients' plan of care, comprehension, educational level, and needs for continuity of care. I. Learning and Motivation
