The 15 Hardest SAT Math Questions Ever
Official SAT Printable Practice Test 2004-05: Questions | Answers It might look as though I've skipped a few years here, but I actually haven't: all the tests for the years not listed are repeats of those above, including the 2011-12, 2010-11, 2009-10, 2008-09, 2006-07, and 2005-06 practice tests.

Printable SAT Practice Tests PDFs: 18 FREE Official Tests
Those SAT geometry questions are mostly about three topics: triangles, circles, and angles. When students ponder the typical question, "how hard is SAT math", terrible visions of shape monsters often appear in their heads. Triangles (and angles) in SAT geometry. The most important of those three is definitely triangles. The SAT loves triangles.

SAT Geometry - Magoosh
Since this is a percentage question, SAT prep site Get800 recommends substituting numbers in for b and k and playing out all of the answers to see which one makes sense. Let's say b = 100 and k = 25. If there are 100 bricks and 25 of them have been stacked, that means 75 bricks have not yet been stacked, or 75% of the bricks.

Math questions from the SATs that everyone gets wrong ...
Triangle questions account for less than 10% of all SAT math questions. That being said, you still want to get those questions right, so you should be prepared to know every kind of triangle: right triangles, isosceles triangles, isosceles right triangles—the SAT could test you on any one of them.

Triangles on SAT Math: Geometry Strategies and Practice ...
For questions 1-15, solve each problem, choose the best answer from the choices provided, and fill in the corresponding circle on your answer sheet. For questions 16-20, solve the problem and enter your answer in the grid on the answer sheet. Please refer to the directions before question 16 on how to enter your answers in the grid.

SAT Math Sample Questions | College Board
Geometry questions on the SAT often have missing information that you need to find. When you approach a geometry question, look for information in one part of the figure that can unlock information in another part of the figure. Here's a process that will work for most geometry questions: Step 1: If you're not given a figure, draw one yourself! Label any given information from the question and determine what the question is asking.
