Desoldering is simply reversing the soldering process, and it's a key skill when it comes to soldering for beginners. This entails: Placing a desoldering braid or wick on the bad joint. Heating the soldering iron and placing its tip on the desoldering braid to melt the solder and allow the braid to absorb it.

A Straightforward Guide To Soldering For Beginners
How to solder for beginners. Ok it wasn't the best solder joint I'd ever made and it didn't last that long but the point I'm trying to make is that learning how to solder isn't that difficult. When I learned how to solder as a beginner there weren't really any instructions.

Step 1: Begin by making sure the tip is attached to the iron and screwed tightly in place. Step 2: Turn on your soldering iron and let it heat up. If you have a soldering station with an adjustable temp control,... Step 3: Wipe the tip of the soldering iron on a damp wet sponge to clean it. Wait a ...

~~How To Solder: A Complete Beginners Guide—Makerspaces.com~~
Molten solder forms a heat bridge between the tip and the solder joint. This solder bridge provides the better and quicker transfer of heat into the solder joint. Continue heating and then apply some solder to the solder joint, not to the tip of soldering iron.

~~How to Solder—Basic Soldering Guide—5 Steps~~
(Image credit: Soldering Is Easy Comic Book) Now, this is really important. Pull away the solder first, and continue holding the iron for another second. This allows the solder to continue to melt and pool, forming a good joint. Then, you can remove the iron. The total process shouldn't take more than 5 seconds, and usually you're aiming for 3-4.

Soldering Tutorial Round Up For Beginners | The Bench
Many beginners often view the process of silver soldering as a bit of a "black art" - it isn't, but three simple rules do need to be followed in order to achieve success. 1) Cleanliness of the components. 2) Correct flux/silver solder combination. 3) Sufficient heat.

SILVER SOLDERING FOR BEGINNERS—Mainsteamodels
To soften your ring, place it onto a soldering block. Begin to heat the band using your soldering torch. Move it across the surface of the band evenly until it turns a glowing 'cherry' red, then remove the heat from the band. Carefully remove the band using tweezers and quench the silver in a bowl of water.
