A fresh take on social class from the experts behind the BBC's 'Great British Class Survey'. Why does social class matter more than ever in Britain today? How has the meaning of class changed? What does this mean for social mobility and inequality? In this book Mike Savage and the team of sociologists responsible for the Great British Class Survey look beyond the labels to explore how and why our society is changing and what this means for the people who find themselves in the margins as well as in the centre. Their new conceptualization of class is based on the distribution of three kinds of capital - economic (inequalities in income and wealth), social (the different kinds of people we know) and cultural (the ways in which our leisure and cultural preferences are exclusive) - and provides incontrovertible evidence that class is as powerful and relevant today as it's ever been.

Since 1979 the world has witnessed a remarkable cycle of personal insolvency law reform. Changes in capitalist economies, financial crises and political interest groups all contributed to this cycle of reform. This book examines the role of interest groups and distinct narratives in shaping reform in different countries while drawing attention to the role of timing, path dependency and unintended consequences in the development of personal insolvency law. The book presents case studies of personal insolvency law in the US, France, Sweden, and England and Wales. It then analyses how, following the Great Recession of 2008, international financial institutions paid greater attention to the significance of household debt in contributing to financial instability and the role of individual insolvency law in providing a fresh start. Personal insolvency law reform became part of EU responses to the eurozone crisis and the EU has proposed harmonisation of individual insolvency law to promote entrepreneurialism. This book examines the extent to which these developments represent an emerging international commonsense about personal insolvency and its relationship to neo-liberalism. Finally, this book discusses whether the international emergence of individual personal insolvency law represents a progressive step or a band-aid for the costs of neo-liberal policies, where a significant number of people live close to the precipice of over-indebtedness.

inequality in educational attainment. It explores the most important theoretical perspectives that have been developed to understand class-based inequality and frame further research. With clear explanations of essential concepts, this book draws on empirical data from the UK and other countries to illustrate the nature and scale of inequalities according to social background, discussing the interactions of class-based inequalities with those according to race and gender. The book relates aspects of inequality to the features of educational systems, showing how policy choices impact on the life chances of children from different class backgrounds. The relationship between education and social mobility is also explored, using the concepts of social closure, positionality and social congestion. The book also provides detailed discussions of the work of Pierre Bourdieu and Basil Bernstein, two important theorists whose contributions have generated thriving research traditions much used in contemporary educational research. Education, Inequality and Social Class will be essential reading for postgraduate and advanced undergraduate students engaged in the study of education, childhood studies and sociology. It will also be of great interest to academics, researchers and teachers in training.

Social Mobility for the 21st Century addresses experiences of social mobility, and the detailed processes through which entrenched, intergenerationally transmitted privilege is reproduced. Contributions include (but are not limited to) family relationships, students' encounters with higher education, narratives of work careers, and 'mobility identities'. The book intends to challenge both the framework of the more traditional approach, and the politicisation of mobility which casts 'mobility' as a possession, a commodity or a character trait, and threatens to castigate the 'non-mobile' as carrying a personal responsibility for their situation. This book presents critical analyses of routes into social mobility, the experience of social mobility, and the political and social implications of social mobility's 'panacea' status. Drawing on the work of established scholars and more recent entrants, the chapters offer a fresh look at social mobility, opening up the topic to a wider readership among the profession and beyond, and stimulating further debate. This book will appeal to higher level students and scholars of sociology alike, as well as having a broad cross-disciplinary appeal.

asserted and denied, confused and clarified, through music. With chapters on key genres, traditions, and subcultures, as well as fresh and engaging directions for future scholarship, the volume considers how music has thought about and articulated social class. It consists entirely of original contributions written by internationally renowned scholars, and provides an essential reference point for scholars interested in the relationship between popular music and social class.

Focusing on principles and theory and their application in the process of constructing housing policy, with boxed examples and case studies throughout, this fully revised 3rd edition addresses the range of socio-economic factors that have influenced UK housing policy in recent years.

This book is a vital new resource in the sociological study of family life in the 21st century. The chapters in this volume explore a diverse range of family and intimate life experiences, such as personal choices about reproduction and how life choices and family forms are mediated by factors including geographical location, race, ethnicity, sexuality, gender, income and government policy. Through a series of evidence-based chapters, leading sociologists explore a diverse range of family and intimate life experiences and the contexts within which they are lived and experienced. Each chapter delves into the lives and experiences of people whose choices in some way seem to disrupt normative and traditional ideas of family, parenting and childhood. Family patterns and experiences of living apart together, troubled families, children in care, culture, coupledness, same-sex families and digital technology are covered and examined innovatively through theoretical engagement. Chapters also incorporate innovative technologies and their use within family spaces that shape the nature of human relationships and interactions. These negotiations within the family are globally contextualised within the political and ideological frameworks of societies at any given moment in time. The work recognises the sensitivity of family and personal lives and incorporates the increasing need of the impact of emotionality that forms part of knowledge production. Additionally, innovative methods are showcased in chapters on researching the family through socially just methods, researcher emotionality and visual data. By bringing together thought-provoking research findings and innovative methodological and theoretical approaches, this collection of essays raises and articulates relevant, timely and future thinking for its readers. This book will therefore be indispensable for students and researchers as well as professionals and policymakers interested in understanding family life in the 21st century.

A quiet revolution has been taking place during the past three decades. The way that children enter families has changed radically among upper middle class families. In the 1980s infertility increasing became defined as a medical problem that could be solved with assisted reproductive technologies (ART) rather than through adoption. Asexual or 'assisted conception' involving medical technologies such as in vitro fertilization and embryo transfers began to replace sexual reproduction for infertile couples. Third parties, referred to as surrogates are hired to assist individuals and/or couples who wish to conceive and child with whom they share a genetic tie. This has resulted in a 'surrogate baby boom.' Outsourcing the Womb provides a critical introduction to the global surrogacy market. A comparative analysis of the assisted

reproductive technology and surrogacy industry in Egypt, Israel, India and the United States disentangles the intersecting roles of race, religion, class inequality, religious law, and global capitalism. Gestational surrogacy challenges the idea of 'natural' reproduction and of the meaning of parenthood. What role should the state play in providing individuals and families with access to reproductive technologies? This book concludes with a discussion of 'reproductive justice'. The goal of this new, unique series is to offer readable, teachable "thinking frames" on today's social problems and social issues by leading scholars, all in short 60 page or shorter formats, and available for view on <http://routledge.customgateway.com/routledge-social-issues.html> For instructors teaching a wide range of courses in the social sciences, the Routledge Social Issues Collection now offers the best of both worlds: originally written short texts that provide "overviews" to important social issues as well as teachable excerpts from larger works previously published by Routledge and other presses.
