According to Kumar and Nair (2004), medicinal plants which are extinct, rare or endangered in wild habitats are conserved in home-gardens by traditional healers, medicinal plant traders and local rural people. The scarcity of medicinal plants in natural habitats has shifted the interest of ethno-botanist to equally focus on both wild and home grown medicinal plants, in an attempt to fully ...

Medicinal Plants of South Asia: Novel Sources for Drug Discovery provides a comprehensive review of medicinal plants of this region, highlighting chemical components of high potential and applying the latest technology to reveal the underlying chemistry and active components of traditionally used medicinal plants. Drawing on the vast experience of its expert editors and authors, the book provides a contemporary guide source on these novel chemical structures, thus making it a useful resource for medicinal chemists, phytochemists, pharmaceutical scientists and everyone involved in the use, sales, discovery and development of drugs from natural sources. Provides comprehensive reviews of 50 medicinal plants and their key properties Examines the background and botany of each source before going on to discuss underlying phytochemistry and chemical compositions Links phytochemical properties with pharmacological activities Supports data with extensive laboratory studies of traditional medicines

This book covers interesting research topics and the use of natural resources for medical treatments in some severe diseases. The most important message is to have native foods which contain high amount of active compounds that can be used as a medicinal plant. Most pharmaceutical drugs were discovered from plants, and still ongoing research will have to predict such new active compounds as anti-diseases. I do believe this book will add significant knowledge to medical societies as well as can be used for postgraduate students.

The medicinal plants have been used since ancient times for the treatment of human ailments. Over three quarters of the world population relies mainly on plants and plant extracts for health care. The herbal medicines today symbolize safety in contrast to the synthetics that are regarded as unsafe to human and environment. In the primeval times, the Indian sagacious held the view that herbal medicines are the only resolution to treat numeral health

related problems and diseases. Although herbs had been prized for their medicinal, flavoring and aromatic qualities for centuries, the synthetic products of the modern age surpassed their importance, for a while. However, the blind dependence on synthetics is over and people are returning to the naturals with hope of safety and security. Understanding the worth and heritage of excellence of medicinal plants the book makes an attempt to provide information on cultivation of medicinal plants and their different uses. This book includes the chemical composition of plants, plant protection, essential oils extracted from plants, cultivation of more than 100 medicinal plants, list of rare medicinal plants and their various uses. The book covers different parameters of medicinal plants cultivation and various ways of their uses. It covers medicinal plants containing alkaloids, steroids flavonoids, glycosides, terpenoids, additives and other active metabolites. We hope that this book will be useful not only for technologists, professionals, but also for farmers, traders, exporters and importers of Medicinal Plants.

Pharmacognosy is a term derived from the Greek words for drug (pharmakon) and knowledge (gnosis). It is a field of study within Chemistry focused on natural products isolated from different sources and their biological activities. Research on natural products began more than a hundred years ago and has continued up to now with a plethora of research groups discovering new ideas and novel active constituents. This book compiles the latest research in the field and will be of interest to scientists, researchers, and students.

Medicinal herbs are the local heritage with global importance. World is endowed with a rich wealth of medicinal herbs. The Variety and sheet number of plants with therapeutic properties is quite astonishing. Medicinal herbs have curative properties due to presence of various complex chemical substance of different composition, which are found as secondary plant metabolites in one or more parts of these plants. These plant metabolites, according to their composition, are grouped as alkaloids, glycosides, corticosteroids, essential oils etc. During the past decade, a dramatic increase in exports of medicinal herbs attests to worldwide interest in these products as well as in traditional health systems. The pharmaceutical industries have made massive investment on pharmacological, clinical and chemical researches all over the world in past five decades. Efforts have been made to discover still more potent plant drugs. The benefits of these efforts would reach to the masses in future in farmers initiate commercial cultivation of medicinal herbs. In fact, agricultural studies on medicinal herbs, by its very nature, demand an equally large investment and higher priority. India, in particular, has a big scope for the development of pharmaceutical and physiochemical industry. The medical plants for health are used as herbal treatments and therapies that can be new habits for culture. Medicinal plants constitute a large segment of the flora, which provide raw materials for use by various industries. They have been used in the country for a long time for their medicinal properties. These plants are staging a comeback and herbal renaissance is happening all over the globe. The herbal medicines today symbolise safety in contrast to the synthetics that are regarded as unsafe to human and environment. This book illustrates the cultivation, utilization of *Abelmoschus Moschatus*, *Abroma Augusta*, *Abrus Precatorius*, *Abutilon Indicum*, *Acacia Arabica*, *Acacia Catechu*, *Acacia Farnesiana*, *Acanthus Illicifolius*, *Achillea Millefolium*, *Achyranthes Aspera*, *Aconitum Napellus*, *Aconitum Heterophyllum*, *Acorus Calamus*, *Adansonia Degitata*, *Adina Cordifolia* *Adhatoda Vasika*, *Adonis Vernalis*, *Aegle Marmels*, *Aerua Lanata*, *Aesculus Hippocastanum*, *Aethusa Cynapium* etc. The book contains systematic account of the most important plants used in medicines. Each chapter covers botanical description, parts used, Ayurvedic properties, clinical uses, constituents with the figure of the plant. This book will be very useful for those working on medicinal plants, natural products, entrepreneurs, libraries, consultant, research scholars etc.

The Quest For Good Health And Immortality Has Been A Continuous Human Endeavour Since The Beginning Of Civilisation Throughout The World. Plants Have Been Used As A Source Of Medicine By Men From Ancient Times. Initially, These Formed The Bulk Of Folk Or Ethnomedicine, Practised In India And Some Other Parts Of The World. Later, A Considerable Part Of This Indigenous Knowledge Was Formulated, Documented And Eventually Passed Into The Organised Systems Of Medicine, Such As Ayurveda, Unani, Sidha Or Some Other Systems Outside India. Subsequently, With The Advance In Techniques Of Phytochemistry And Pharmacology, A Number Of Active Principles Of Medicinal Plants Were Isolated And Introduced As Valuable Drugs In Modern Medicine. The Second Revised And Enlarged Edition Of Book, Medicinal Plants : Utilisation And Conservation, Contains 24 Chapters Covering Holistic Information On Medicinal Plants. Four New Chapters Added Includes Articles On Medicinal Plant Solutions To Asthmatic Problems, Biotechnological Advances In Some Ethnomedicinal Plant Species; *Catharanthus Roseus* A Potential Drug Source For Cancer Chemotherapy And Biotechnological Interventions And Role Of Secondary Metabolites In Defense Mechanism Of Plants. Book Contains Articles On Cultivation And Propagation Of Medicinal Plants, Medicinal Pteridophytes, Diseases Of Medicinal & Aromatic Plants, Herbal Based Contraceptive Research, Plants With Antioxidative Properties In Radio-Protection, Ipr, And Growth & Competitiveness Of Indian Pharmaceutical Industries. Second Revised & Enlarged Edition Of Book Update The First Edition Besides Adding Four New Chapters. Book Will Be Useful To Practiners Of Medicines, Farmers, Researchers In Botany, Pharmacologists And Students.

This volume brings together a collection of papers by some experts in medicinal plants. It is presented as a contribution to clarifying the many policy and technical issues associated with the conservation, use, production and trade of medicinal plants. This publication draws attention to the huge contribution of medicinal plants to traditional and modern health care systems, but also alert the readers on the many problems and challenges facing their sustainable development, such as: assessment and management of the medicinal plant resource base; best harvesting and processing practices; trade issues and aspects dealing with the intellectual property rights on traditional medicine by indigenous peoples. The use of this document will help raise the awareness on medicinal plants as an important forest resource, and will help ensure that medicinal plants are adequately included in forest conservation and utilization programmes.

The Himalayan Region is a mega hot spot for biological diversity. It supports over 1,748 plants species of known medicinal value. This title focuses on origin and distribution of Himalayan herbs, their medicinal potential, industrial significance, and research advancements pertaining to molecular breeding and omics-based approaches. Discusses evolved secondary biochemical pathways often in response to specific environmental stimuli Reviews conservation efforts Presents an in-depth analysis of 12 key species

Medicinal plants are important for human health. These plants have been used from the prehistoric times to present day. These plants based medicines are consumed in all civilizations. It is believed that the herbal medicine can give good effect to body without causing side effects to human life. Medicinal plants are not only a major resource base for the traditional medicine & herbal industry but also provide livelihood and health security to a large segment of Indian population. Medicinal plants constitute a large segment of the flora, which provide raw materials for use by various industries. They have been used in the country for a long time for their medicinal properties. These plants are staging a comeback and herbal renaissance is happening all over the globe. The herbal medicines today symbolise safety in contrast to the synthetics that are regarded as unsafe to human and environment. Although herbs had been prized for their medicinal, flavouring and aromatic qualities for centuries, the synthetic products of the modern age surpassed their importance, for a while. However, the blind dependence on synthetics

is over and people are returning to the naturals with hope of safety and security. Besides, the usage of medical plants has been increasing as an important role that can support the economic system. Ayurveda, the well known indigenous system of medicine, is still regarded as a well organised traditional health care for large sections of rural as well as urban population of India. The medicinal plants sector at present is not well organised and needs special attention. Although different Ministries and Department in the Government sector and NGOs and individuals in the private sectors are making their efforts in different directions, yet there is a need to co ordinate and systematize. The medical plants for health are used as herbal treatments and therapies that can be new habits for culture. The market is very competitive and could easily be oversupplied. This book basically deals with therapeutic potential of medicinal plants, medicinal plants priorities in Indian medicines diverse studies and implications, recent developments of some natural products, production and management of medical plants on farms, classification, identification and naming of medicinal plants, pests and pest management in medicinal plants, Ajmalicine (Raubasine): a medicinally important alkaloid from catharanthus roseus (vinca rosea), cultivation of rutin bearing eucalyptus species, iridoids and secoiridoids of the genus swertia, studies on medico ethnobotany, tropical periwinkle, tulsi, etc. The present book covers cultivation practices of selected commercially important medicinal plants with their processing details and uses. The book is very resourceful for medicinal plants growers, professionals, researchers, entrepreneurs and agriculture universities.
