Study Guide Intervention Verifying Trigonometric Identities

Use the basic trigonometric identities along with the definitions of the trigonometric functions to verify trigonometric identities. Often it is easier to begin with the more complicated side of the equation and transform that expression into the form of the simpler side. Verify that each of the following is an identity. Example a. $\sec^2 \theta = 1 + \tan^2 \theta$

Verify a Trigonometric Identity by Factoring Verify that $\cos^2 x \sec^2 x \tan x - \cos x \tan^3 x = \sin x$. $\cos x \sec^2 x \tan x - \cos x \tan^3 x = \cos x \tan x (\sec^2 x - \tan^2 x)$ Start with the left-hand side of the identity. Factor. $= \cos x \tan x (1)$ Pythagorean Identity = Quotient Identity Divide out the common factor of $\cos x$. $= \sin x$

You simplified trigonometric expressions. (Lesson 5-1)

To verify any trigonometric identity using the unit circle, you follow the same set of guidelines: Choose a side to start with. (Usually the more complicated side.) Write it down. Convert all Trigonometric functions to expressions involving x and y using the definitions above. It may also be ...

#1 NEW YORK TIMES, WALL STREET JOURNAL, AND BOSTON GLOBE BESTSELLER • One of the most acclaimed books of our time: an unforgettable memoir about a young woman who, kept out of school, leaves her survivalist family and goes on to earn a PhD from Cambridge University “Extraordinary . . . an act of courage and self-invention.”—The New York Times NAMED ONE OF THE TEN BEST BOOKS OF THE YEAR BY THE NEW YORK TIMES BOOK REVIEW • ONE OF PRESIDENT BARACK OBAMA’S FAVORITE BOOKS OF THE YEAR • BILL GATES’S HOLIDAY READING LIST • FINALIST: National Book Critics Circle’s Award In Autobiography and John Leonard Prize For Best First Book • PEN/Jean Stein Book Award • Los Angeles Times Book Prize Born to survivalists in the mountains of Idaho, Tara Westover was seventeen the first time she set foot in a classroom. Her family was so isolated from mainstream society that there was no one to ensure the children received an education, and no one to intervene when one of Tara’s older brothers became violent. When another brother got himself into college, Tara decided to try a new kind of life. Her quest for knowledge transformed her, taking her over oceans and across continents, to Harvard and to Cambridge University. Only then would she wonder if she’d traveled too far, if there was still a way home. “Beautiful and propulsive . . . Despite the singularity of [Westover’s] childhood, the questions her book poses are universal: How much of ourselves should we give to those we love? And how much must we betray them to grow up?”—Vogue NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Washington Post • O: The Oprah Magazine • Time • NPR • Good Morning America • San Francisco Chronicle • The Guardian • The Economist • Financial Times • Newsday • New York Post • theSkimm • Refinery29 • Bloomberg • Self • Real Simple • Town & Country • Bustle • Paste • Publishers Weekly • Library Journal • LibraryReads • Book Riot • Pamela Paul, KQED • New York Public Library
