Recently widowed, Rebecca Parcell is too busy struggling to maintain her farm in Morristown to give a fig who wins the War for Independence. But rumors are spreading in the winter of 1780 that she's a Loyalist sympathizer who betrayed her husband to the British—quite a tidy way to end her disastrous marriage, the village gossips whisper. Everyone knows that her husband was a Patriot, a hero who died aboard a British prison ship moored in New York Harbor. But "everyone" is wrong. Parcell was a British spy, and General Washington—who spent that winter in Morristown—can prove it. He swears he'll safeguard Becca's farm if she unravels her husband's secrets. With a mob ready to exile her or worse, it's an offer she can't refuse. Escaped British prisoner of war Daniel Alloway was the last person to see Becca's husband alive, and Washington throws this unlikely couple together on an espionage mission to British-occupied New York City. Moving from glittering balls to an underworld of brothels and prisons, Becca and Daniel uncover a plot that threatens the new country's future. But will they move quickly enough to warn General Washington? And can Becca, who's lost almost everyone she loves, fight her growing attraction to Daniel, a man who always moves on?

New materials and technologies play a significant role in architecture and design. Environmentally compatible materials and production methods are demanded just as much as smoothly functioning recycling management. In addition, trends like digitalization, 3D printing and intelligent systems and materials have a decisive influence on material innovations. The book 's eight chapters span a bridge from science and industrial research to applications in architecture and design. In a compact format, it offers a well-grounded overview of the latest material innovations, including edible packaging, liquid light and intelligent natural materials. At the same time, the societal dimension of such developments is taken into consideration.

Examines the life of Paul the Apostle using Biblical passages and studies of ancient Jewish life in Biblical times and finds lessons of faith, humility, and self-sacrifice which modern Christians can apply to their own lives.

Psychopathology has been designed to provide students with a comprehensive coverage of both psychopathology and clinical practice, including extensive treatment techniques for a range of mental health issues. The text is designed to be accessible to students at a range of different learning levels, from first year undergraduates to post-graduate researchers and those undergoing clinical training. Psychopathology is primarily evidence and research based, with coverage of relevant research from as recently as 2013, making it useful to researchers as well as clinicians. The emphasis in the book is on providing students with a real insight into the nature and experience of mental health problems, both through the written coverage and by providing a range of video material covering personal accounts of mental health problems. The text is integrated with a wide variety of teaching and learning features that will enable facilitators to teach more effectively, and students to learn more comprehensively. Many of these features have been updated for the new edition and new material has been included to reflect the changes in DSM-5. Features include Focus Points that discuss contentious or topical issues in detail, Research Methods boxes showing how clinical psychologists do research on psychopathology, and Case Histories detailing a range of mental health problems. Online resources An all new student website is available at www.wiley-psychopathology.com. The website houses a huge variety of new digital material including more than 50 instructional and supplementary videos covering descriptions of symptoms and aetiologies, examples of diagnosis and diagnostic interviews, recounted personal experiences of people with mental

health problems, and discussions and examples of treatment. The site also contains hundreds of new student quizzes, as well as revision flashcards, student learning activities, discussion topics, lists of relevant journal articles (many of which provide free links to relevant articles published in Wiley Blackwell journals), and topics for discussion related to clinical research and clinical practice. A fully updated lecturer test bank has also been developed including over 1,000 questions, as well as suggested essay questions and these can be accessed by instructors on our lecturer book companion site.

This volume is a collection of cutting-edge research papers written by well-known researchers in the field of Romance phonetics and phonology. An important goal of this book is to bridge the gap between traditional Romance linguistics with its long and rich tradition in data collection, cross-language comparison, and phonetic variation and laboratory phonology work. The book is organized around three main themes: segmental processes, prosody, and the acquisition of segments and prosody. The various articles provide new empirical data on production, perception, sound change, first and second language learning, rhythm and intonation, presenting a state-of-the-art overview of research in laboratory phonology centred on Romance languages. The Romance data are used to test the predictions of a number of theoretical frameworks such as gestural phonology, exemplar models, generative phonology and optimality theory. The book will constitute a useful companion volume for phoneticians, phonologists and researchers investigating sound structure in Romance languages, and will serve to generate further interest in laboratory phonology.

Although psychoanalytic theory is one of the most potent and influential tools in contemporary literary criticism, to date it has had very little impact on the study of African American literature. Critical methods from the disciplines of history, sociology, and cultural studies have dominated work in the field. Now, in this

exciting new book by the author of *Domestic Allegories: The Black Heroine's Text at the Turn of the Century*, Claudia Tate demonstrates that psychoanalytic paradigms can produce rich and compelling readings of African American textuality. With clear and accessible summaries of key concepts in Freud, Lacan, and Klein, as well as deft reference to the work of contemporary psychoanalytic critics of literature, Tate explores African- American desire, alienation, and subjectivity in neglected novels by Emma Kelley, W.E.B. Du Bois, Richard Wright, Zora Neale Hurston, and Nella Larsen. Her pioneering approach highlights African American textual realms within and beyond those inscribing racial oppression and modes of black resistance. A superb introduction to psychoanalytic theory and its applications for African American literature and culture, this book creates a sophisticated critical model of black subjectivity and desire for use in the study of African American texts.

Almost 20% of the effusions examined are directly or indirectly related to the presence of malignant disease, with carcinoma of the lung as the most common underlying culprit. This volume published in the *Essentials in Cytopathology* book series will fulfill the need for an easy-to-use and authoritative synopsis of site specific topics in cytopathology. These guide books fit into the lab coat pocket, ideal for portability and quick reference. Each volume is heavily illustrated with a full color art program, while the text follows a user-friendly outline format.
