The human heart is a finely-tuned instrument that serves the whole body. It is a muscular organ around the size of a closed fist, and it sits in the chest, slightly to the left of center. The heart...

The heart: Anatomy, how it works, and more

The heart is a muscular organ about the size of a fist, located just behind and slightly left of the breastbone. The heart pumps blood through the network of arteries and veins called the...

Human Heart (Anatomy): Diagram, Function, Chambers ...

The heart sends blood around your body. The blood provides your body with the oxygen and nutrients it needs. It also carries away waste. Your heart is sort of like a pump, or two pumps in one. The right side of your heart receives blood from the body and pumps it to the lungs.

Your Heart & Circulatory System (for Kids) - Nemours ...

Your heart is roughly the size of a fist and sits in the middle of your chest, slightly to the left. It's the muscle at the centre of your circulation system, pumping blood around your body as your heart beats. This blood sends oxygen and nutrients to all parts of your body, and carries away unwanted carbon dioxide and waste products.

How your heart works | NHS inform

The heart is a muscular organ in most animals, which pumps blood through the blood vessels of the circulatory system. The pumped blood carries oxygen and nutrients to the body, while carrying metabolic waste such as carbon dioxide to the lungs.

Heart's £10k All Day: Our final day comes to an end - Heart

So when we read about the heart in the Bible, it is about the place where you have your will, your attitude and intentions, and which is the source of your thoughts, actions and words. This heart is the core of who you are as a person. Your heart is, essentially, you. With your heart you choose between good and evil.

What does it say about the heart in the Bible?

Your heart is made up of three layers of tissue: Pericardium – a thin outer lining that protects and surrounds your heart. Myocardium – a thick muscular middle layer that contracts and squeezes blood out of your heart. Endocardium – a thin inner lining.

How your heart works – Heart and circulatory system ...

The heart is an organ about the size of your fist that pumps blood through your body. It is made up of multiple layers of tissue. Your heart is at the center of your circulatory system. This system is a network of blood vessels, such as arteries, veins, and capillaries, that carries blood to and from all areas of your body.

How the Heart Works & Pumps Blood Through The Human Body

All Our Health is a series of resources for health and care professionals working with patients and the population. Aimed at preventing illness, protecting health and promoting wellbeing.

All Our Health: about the framework - GOV.UK

The heart is like a big pump made of muscles, and it constantly pumps blood throughout our bodies every minute of every day. These movements are called 'involuntary' which means you don't actually have to think about making your heart beat; your brain does the work for you and passes on the message.

The Heart For Kids | Cool Kid Facts

The heart is the organ that helps supply blood and oxygen to all parts of the body. It is divided by a partition (or septum) into two halves. The halves are, in turn, divided into four chambers. The heart is situated within the chest cavity and surrounded by a fluid-filled sac called the pericardium.

The Anatomy of the Heart, Its Structures, and Functions

with all my heart With all the energy and enthusiasm I can muster. This phrase has been around since the sixteenth century, and was so well known by the time Jonathan Swift assembled Polite Conversation (1738) that he wrote, "With all my heart and a piece of my liver."
